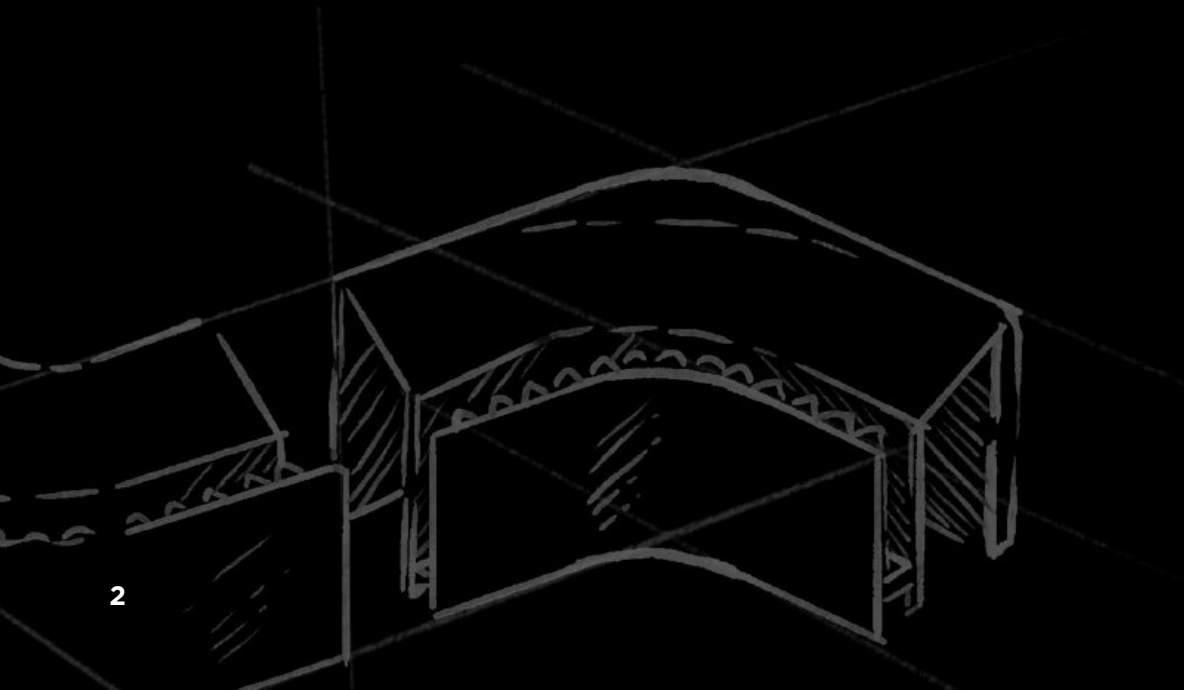
MAKING LIGHTING SIMPLE™

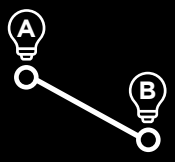
sensio®

BEAUTIFULLY SIMPLE LIGHTING SOLUTIONS

Since 2007 we've been creating lighting in harmony with modern life. Specialising in kitchens, bedrooms and bathrooms, quality and innovation has always been at the heart of what we do, from lighting that stands the test of time to technology that's exclusive to us.
At Sensio we pride ourselves on providing premium products matched with a flawless execution and service. All of our lighting solutions are designed and developed right here in the UK, where we can constantly strive to create new concepts to brighten people's lives. Always pushing to pioneer new technology that seamlessly illuminates customers' homes, our passion is making lighting both intelligently simple and beautiful.
We hope to inspire your space with the power of lighting and thank you for partnering with us at Sensio.

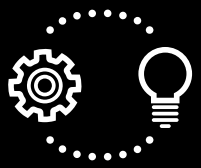
Michael Linsky
Managing Director





Making Lighting Simple

Our Promises to You



Market Leading Innovation

Making Lighting Simple - one of the defining principles by which we live and breathe. Everything we do, whether it is in the design of our products, our customer service or how we communicate, we strive to always have Making Lighting Simple at the core. If it's not simple for you, our customer, we find another way until it is. We place our focus on doing things a little differently. We are dedicated to designing and developing new and innovative lighting solutions that meet various design requirements. Our high quality range of products offer the very latest LED technology and features to work in harmony with customer's kitchens and bedrooms. With our own in-house Product Development Team, we have the ability to not only work closely with customers to design products we know they need, but also innovate and lead the way in creating first to market, patented products. We're here to offer our exemplary service levels to every single customer. Whether that's a quick resolution to your email query, ensuring your orders get to you on time and in full or proactive communication and exceptional account management, we're committed to offering extraordinary service at every point.

Extraordinary Service

GUARANTEE 5 YEAR

DESIGNED IN THE UK

BRITISH INSTITUTE OF KBB INSTALLATION SPONSOR

PIONEERING DESIGN

We don’t just follow the trends. We help set them.

Designing in-house, we develop our products and packaging with the future in mind. Thinking about efficiency and waste reduction whilst creating high quality innovation. Our expertise and industry knowledge is an integral part of our business with our in-house product development and design team based here in the UK. To us, every detail makes the difference and we’re not satisfied until each product is finished to the highest standard. A number of our lights and profiles carry Registered Design Rights. This means as we strive to continually bring innovative and exciting products to the market, our valued partners can be assured of having access to products they won’t find elsewhere. Our extensive product range is also constantly reviewed, enhanced and improved to ensure we stay at the forefront of our industry.

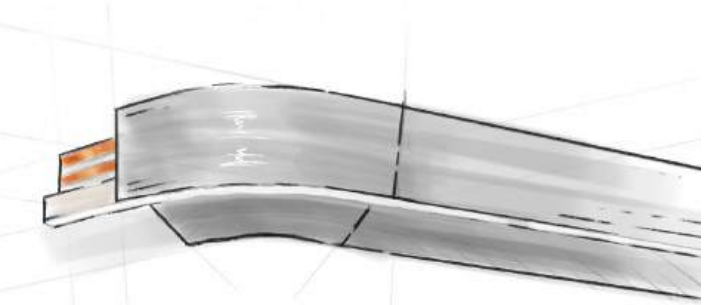
Superior quality, guaranteed durability

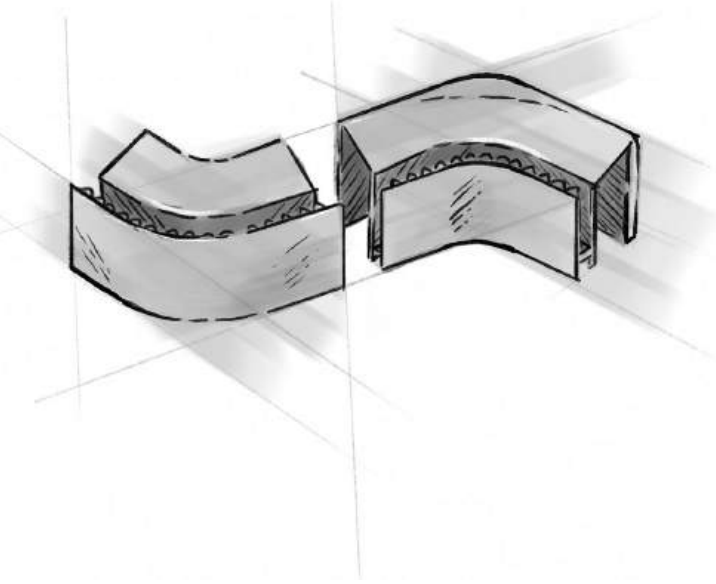
We pride ourselves on using only the best components and materials to guarantee long life performance, high light output and enhanced durability. All of our products go through rigorous third-party testing and we’re proud to be ISO 9001 accredited. Our products have won awards for their design excellence time and time again and we’re so confident that each product will exceed your expectations that we offer a 5-year guarantee on all of our kitchen and bedroom fittings.

Inspiring service & solutions

We’re always researching the latest trends, technology and fashion to deliver solutions that stand the test of time. We delve deep into the market to shine a light on how our products can improve home environments and the way people live. So whenever you choose a Sensio product, you can be assured it’s been thoughtfully created for the future.

DESIGNED IN THE UK





We're working towards a more sustainable future and are committing resources to actively reduce our footprint.

We care about our impact on the world and have set ourselves goals over the next 3, 5 and 10 years to meet high standards throughout our processes, operations and products to limit or mitigate our impact on the environment. These include:

Packaging

We aim to reduce plastics from our product packaging as much as possible, including recyclable plastics, in favour of paper and cardboard

Product

All products will be created with Long Design Life in mind, ensuring robust, long serving products including use of high quality LEDs for maximum life span

Partnerships

Careful selection of our production partners evaluated in accordance with our guidelines and carry ISO 14001

Net Zero

Improve the robustness of our supply chain to mitigate air carriage, maximise sea freight effeciences and increase local production to help achieve our target of Net Zero

THE POWER OF **LIGHTING**

Lighting can completely transform your space beyond the practical benefit it brings. It creates ambience, a brighter, more spacious and multi-dimensional feel and highlights design features. Considering a lighting scheme at the initial design stages will influence the overall atmosphere of the interior space.

CREATING A LIGHTING PLAN

Add impactful lighting to the kitchen by following our simple and stress-free tips.

Light in layers

Splitting lighting into three categories from task to mood and convenience gives you the opportunity to layer your lighting. Start with task lighting around food preparation areas, transition into convenience lighting inside cupboards or drawers and then consider how mood lighting could create an ambient atmosphere.

Factor in the power

Creating multiple zones of lighting calls for power to different parts of the kitchen. It's much easier to install the wiring before the kitchen installation, so plan where wiring needs to be included so you can power the lights once installed. Think about the wall units, base units and the island unit if you want to create feature lighting under worktop edges or plinths.

Complement the kitchen design

Is the kitchen contemporary or traditional? Rustic or modern? This may help inform the style of fitting you choose but also the colour temperature of the lights. Warm white LEDs emit a yellow glow and complement a traditional style kitchen featuring wood surfaces and muted worktops perfectly, whereas cool white LEDs are more suited to contemporary style kitchens. The white light bounces off gloss or contemporary surfaces like granite for a mesmerising finish.

Get creative

Much more than a functional feature, lights can truly transform a space. Zoning the lights so they run from different switches really helps make the most of the space as you're in control of which lights turn on and when.

Consider the controls

Lighting elements can be controlled either together or separately depending on the kind of lighting you install and how the kitchen space will be used. For example, you may want all the under cabinet lighting to turn on together, you may want the kitchen cupboards to light up when the cupboard door is opened, or you may want to create a relaxing ambience with feature lighting switched on with the touch of a remote or smart phone app.

We know how important it is for customers to envision how their kitchen design will look in the initial stages. To ensure the process runs as smoothly as possible, we are partnered with leading kitchen design software to bring your dream plans to life: 2020, KBB Connect, KBB Smart and Compusoft.

ARTICAD Designed to help you sell www.articad.com TruBlue Cyncly KBBConnect KBBSmart

CHOOSING KITCHEN LIGHTING

Kitchen lighting can be split in to three categories, with each offering its own purpose and benefits:

1

Task Lighting

As the name suggests, task lighting is perfectly positioned to ensure the kitchen is an efficient working space for everyday tasks such as cooking. Typically, kitchen task lighting is positioned under wall units to illuminate the worktop, focusing light exactly where it is needed.

2

Convenience Lighting

Convenience lighting illuminates cupboards, wardrobes and drawers when opened for ultimate ease of use, while adding a luxurious finish to the kitchen or bedroom design.

3

Mood Lighting

Mood lighting creates depth and dimension, which is essential for creating atmosphere within a room. If you're looking to brighten the mood of the kitchen, consider lighting along the plinth, up-lighting above wall units, lighting beneath breakfast bars or the underside of a worktop and lighting the inside of glass fronted cabinets. Mood lighting is often overlooked, but one that can have a profound impact.

2
1
3

CUSTOM COLOUR

The LED colour you choose can make a huge impact on the overall look

Choosing the right lighting colour will boost the aesthetics of the design by complimenting the chosen colours and materials. Typically, LEDs are available as cool, natural or warm, and we use a measure called the Kelvin scale (K) to determine the temperature output of our lights. Anything between 2500K and 3000K is considered warm, 3500K and 4500K is natural, while anything between 4500K and 6500K emits a cooler temperature.

Cool white LEDs are more suited to contemporary or modern styles. Cool white bounces off gloss or contemporary surfaces to create a stunning effect.

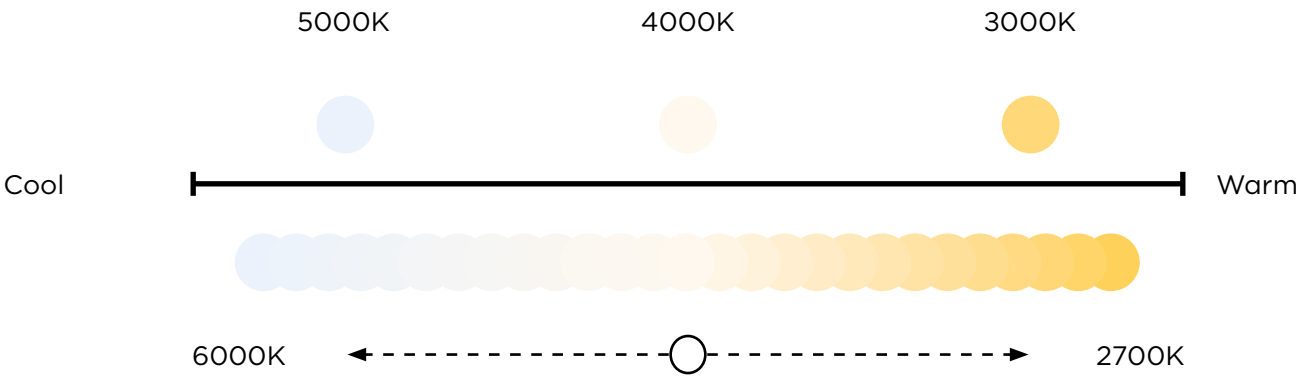
Natural white sits between warm and cool white and recreates the effect of natural daylight. Natural white's versatility means it can complement a range of styles.

Warm white LEDs emit a yellow glow (similar to that of a halogen) and perfectly complement traditional styles with features such as timber finishes and muted worktops.

TrioTone®

A Sensio trademarked concept first introduced in 2017, TrioTone® provides 3-in-1 lighting choice in one fitting. These diverse products are specifically designed to provide the option to select or change the colour temperature without having to replace the whole fitting. Sensio TrioTone® products can be set to 3000K (warm white), 4000K (natural white) or 5000K (cool white).

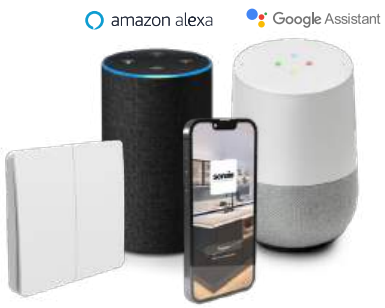
TrioTone® lights feature a switch to set the colour temperature on individual fittings.



CCT

Correlated Colour Temperature (CCT) is a concept that provides a seamless transition from warm to cool white temperatures.
CCT gives the user the power to cycle through the full spectrum of temperatures between cool, natural and warm light. This allows you to accurately mimic outside lighting conditions - a feature that has been scientifically proven to have a positive impact on our health.

CCT products allow for advanced control via our Universal Remote & CCT receiver or Titan Smart Kinetic Driver paired with the kinetic switch, Link Sensio app or smart home device

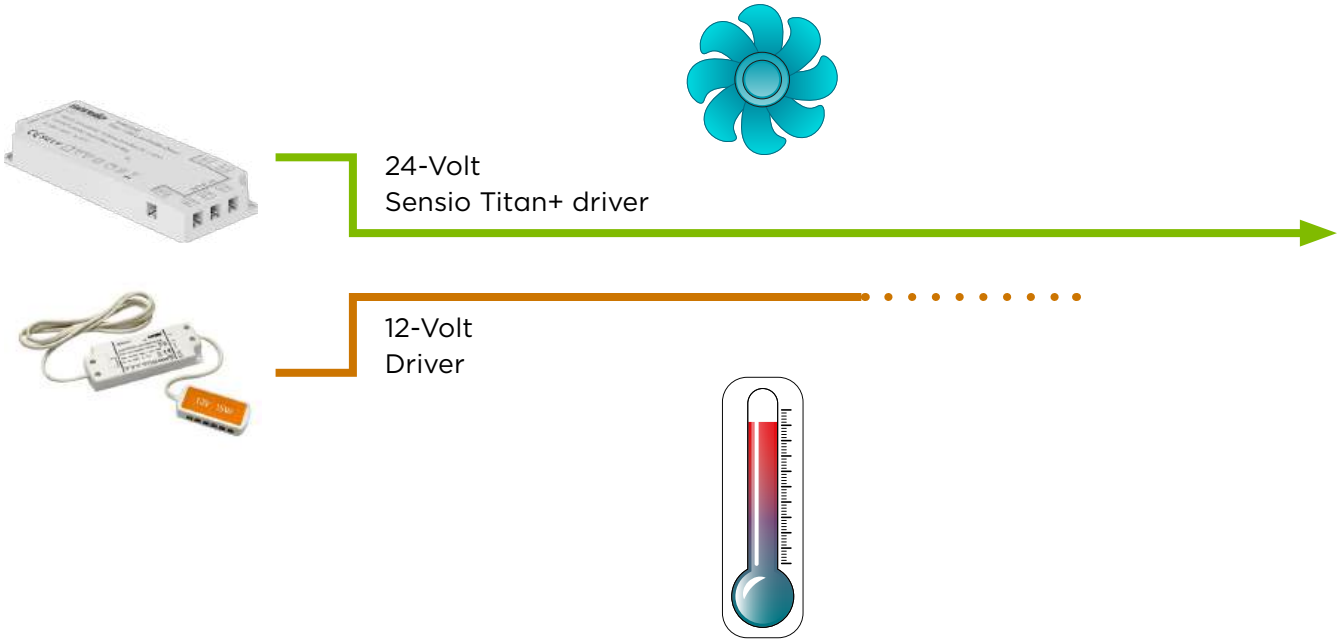


TECHNICAL CENTRE

Some lights present different options for installation, linking together and control. These pages, alongside the detailed information around choosing the correct driver found on pages 180-181, will make the process of selecting and installing our lighting as simple as possible.

12-Volt vs. 24-Volt Lighting

All Sensio lights are 24-volt, offering a number of benefits over alternative 12-volt solutions.



Less voltage drop

24-Volt allows for longer runs of light with no loss of power or brightness over distance.

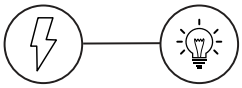
Stays cooler

24-volt lighting dissipates less heat and stays cooler over time. This means more efficient lights which don't overheat.

Up to 75% more efficient

For a given power wattage, a 24-volt Sensio product will consume 50% less current than the 12-volt equivalent, offering up to 75% more efficiency when factoring reduced heat loss.

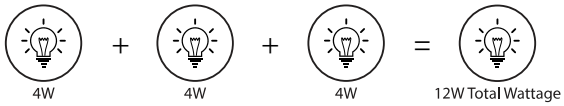
Power



240V Products

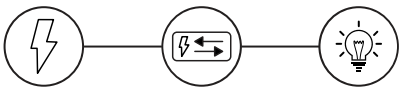
240 volt products can either be plugged into a power socket or wired directly to the mains.

Please note: The majority of 240V products do not come with a pre-wired plug.



Wattage and LED Drivers

The number of lights that an LED driver can power is determined by the wattage, so it is important that the driver selected has an adequate wattage for the lights. The appropriate LED driver can be easily found by calculating the total wattage of all lights in the run. The total wattage should not exceed the rated wattage of the LED driver.



24V Products

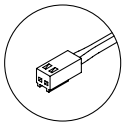
24V is significantly lower than the mains electricity that comes into our homes. Our low voltage products require an LED driver that converts the voltage from 240V to 24V. All our 24V products are Plug & Play - this means they plug directly into the LED driver without the need for an electrician.

Daisy Chain Products

To make installation as simple as possible, some of our products can be linked together in a daisy chain. This is a great way to extend the range of an LED driver in a long run of lights. Especially when powered with a higher voltage, such as 24V.

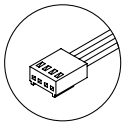
TECHNICAL CENTRE

Connectors



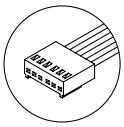
2-Pin

The most-common type of connector in the Sensio range and compatible with all drivers (with exception of the CCT Titan Smart Kinetic Driver). This type of connector is also compatible with the Single Colour Receiver.



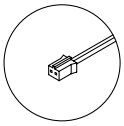
4-Pin

These are found on our CCT products and are compatible with Titan Smart Kinetic Drivers and the CCT Receiver.



6-Pin

These are found on our RGBCCT products and assist in the control of both colour temperature and RGB in compatible products.



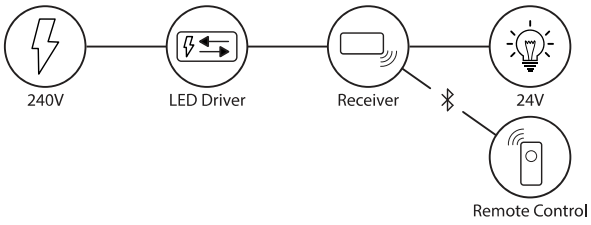
Quick Connect

This port enables the driver connection cable to plug directly into the back of the lamp, simplifying installation.

Lighting Control

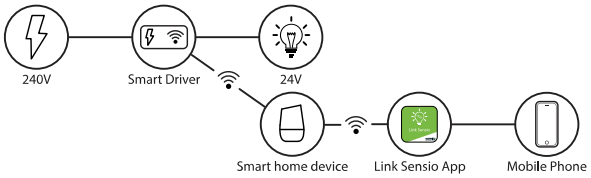
Receivers and Remotes

Receivers and remotes allow for additional lighting control such as dimming, changing colour temperature and RGB. These can be added to most Sensio products.



Smart Products

Smart Drivers allow Sensio 24V products to connect to smart home devices such as the Google Assistant and Amazon Alexa via the Link Sensio App, adding smart lighting control. See more on p188.



Sensors & Switches

Infrared (IR) sensors

IR sensors are used to control lighting with close-range hand gestures. Example: waving to turn your lights on/off.

Passive infrared (PIR) sensors

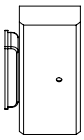
PIR sensors are used to control lighting when somebody enters the detection range. Example: entering a room.

Gate / door sensors

Gate (or door) sensors are used to control lighting with the opening and closing of doors. Example: opening a cabinet or drawer.

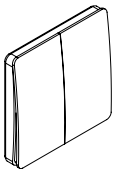
Push switches & touch sensors

Push switches are used to control lighting with the push of a button.



Magnet and reed switch

A magnet and reed switch is used to control lighting with the opening and closing of doors. Multiple switches can be set up to control the same set of lights. It is also wireless.



Kinetic switch

Kinetic switches are used in conjunction with the Titan Smart Kinetic drivers or mains 240V kinetic receiver, to offer the freedom of wireless control. The switches require no additional power or installation and offer advanced control such as dimming and colour adjusting when configured with CCT lights. 1, 2 and 3 gang switches available.

THE SENSIO SERIES

Design and innovation are at the core of Sensio, Striving for simplicity without compromise

50,000 Hours Light Life

Fantastic longevity providing the equivalent life to having the lights switched on continuously for 5 hours a day, for 27 years!

High Efficiency

Not only does each light benefit from a superb lumen output, ensuring bright illumination, each light runs off 24V, making them exceptionally efficient to run and providing maximum light performance.

High Colour Accuracy

Brightness and consistency of the lights is of exceptional standard and provides a true reflection of the colour temperature.

Quality Guaranteed

Each light has been designed and manufactured to guarantee superb performance, longevity and quality and benefits from Sensio's 5 year guarantee.

Our collections are designed to group products by features to make the lighting design process easy. Ranging from a simple all natural white set, controlled at the wall through to voice activated, custom colour solutions.

All Sensio lights feature the same quality components and designs at their core to deliver stylish and efficient products, you can trust will last a lifetime:

SERIES 1

Simplicity

A concise range of simple, high quality LED lights with no compromise on quality or efficiency whilst benefitting from excellent pricing (based on minimum order quantities).

SERIES 3

Choice

Choice and customisation offered across a wide selection of products adding colour temperature options and different product finishes.

SERIES 5

Technology

Advanced lighting colour technology and control options to truly bring smart connectivity to the home.

PRODUCT FEATURES GUIDE

All our products have their own unique features. To help compare and select products quickly and easily, you will find icons on each product page.

Notes

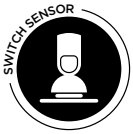
- All products are IP20 unnless stated as higher
- Always refer to the installation guides provided with all our products for more detailed information on fitting
- Whilst Sensio lights are designed to be simple plug & play systems, any mains electrical work should be carried out by a certified electrician

Connect & Control

Infra-red sensor - swipe activated

Touch activated

Activates on opening of a door or drawer

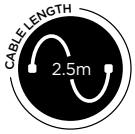


Push button activated

Wireless Kinetic

PIR sensor - motion activated

Installation



Supplied cable length

Fire rated for additional safety

Battery powered (Replacable)

Rechargeable battery power

Resistant to larger objects such as fingers. No water protection

Resists ingress of objects over 1mm and water splashes

Resists partial dust ingress and water splashes

Dust and air tight. Resists low pressure water jets

Lifestyle

Bluetooth connectivity enabled

Sync with your smart home devices

Integrated Qi charger for wireless capable devices

Can be controlled via the ‘Link Sensio’ App

FLEXIBLE LED STRIP LIGHTING

- Simple to use and can be installed almost anywhere
- Adds depth to the kitchen by illuminating above the wall units, along the plinth or under the worktop edge
- Perfect for creating ambient mood lighting
- Can be used inside profiles, which offer an alternative way to secure the strip, diffuse and angle the light

Flexible Strips - Quick Comparison

FLEXIBLE STRIP	VHB TAPE	DESCRIPTION	WATTAGE	LUMENS	COLOUR TEMP.
Dart	Yes	A simple, highly efficient flexible strip light with superb light output.	3.6 W/m	410 lm/m	Natural (4000K)
Primo 2	Yes	A versatile and efficient strip, ideal for use along plinths.	3.6 W/m	425 lm/m 415 lm/m	Cool (5000K) Warm (3000K)
Neutron	Yes	At just 3.5mm in width, this is the industry's smallest flexible strip!	4.8 W/m	565 lm/m 560 lm/m 535 lm/m	Cool (5000K) Neutral (4000K) Warm (3000K)
Sigma 2	Yes	The innovative construction allows this bendable strip to go around 90 degree corners.	4.8 W/m	570 lm/m 575 lm/m 530 lm/m	Cool (5000K) Natural (4000K) Warm (3000K)
Viva 3	Yes	A versatile, silicone coated, IP54 flexible strip.	4 W/m	520 lm/m 505 lm/m 470 lm/m	Cool (5500K) Natural (4000K) Warm (3000K)
Radiant	Yes	A fully diffused, bendable, silicone flex strip which can be recessed into a surface.	4.8 W/m	305 lm/m 293 lm/m 285 lm/m	Cool (6000K) Natural (4000K) Warm (3000K)
Razor	Yes	An edge-lit COB flexible strip, ideal for directing light across a surface.	6 W/m	415 lm/m	Natural (4000K) Warm (3000K)
Delta	Yes	A fully diffused, silicone strip with 3 sides of illumination.	6 W/m	600 lm/m	Cool (5000K) Warm (3000K)
Polar X	Yes	An updated model of our popular COB strip, bringing the ability to cut anywhere.	6 W/m	600 lm/m	Cool (6500K) Natural (4000K) Warm (3000K)
Razor X	No	A free-cut edition of our edge-lit strip, designed for recessing or use in the Edge profile.	6 W/m	508 lm/m	Natural (4000K) Warm (3000K)
Ion 8	Yes	Featuring our custom colour tecnology for light at your desired temperature.	6 W/m	600 lm/m	CCT (2700K - 6000K)
Ion 5	Yes	Slimmer cousin to the Ion 8 at just 5mm in width with a high LED per metre count.	6 W/m	600 lm/m	CCT (2700K-6000K)
Radiant Pro	Yes	A fully diffused, bendable, silicone flex strip which can be recessed into a surface.	4.8 W/m	293 lm/m	CCT (2700K - 6500K)
Polar Pro	Yes	A superior strip with a fully diffused, continuous light output and adjustable temperature.	6 W/m	600 lm/m	CCT (2700K - 6500K)
Polar X Pro	Yes	A superior free-cut strip with continuous light output and adjustable temperature.	6 W/m	600 lm/m	CCT (2700K - 6500K)
Razor X Pro	No	A recessable, edge-lit strip, providing continuous light with adjustable temperature.	6 W/m	508 lm/m	CCT (2700K - 6500K)
Flux	Yes	A fully customisable flex strip. Set any RGB colour or white temperature.	6 W/m	220 lm/m 540 lm/m	RGB CCT (2700K - 6000K)
Polar RGBCCT	Yes	A fully customisable flex strip. Set any RGB colour or white temperature.	6 W/m	220 lm/m 540 lm/m	RGB CCT (2700K - 6000K)

All our products have their own unique features. To help compare and select products quickly and easily, you will find icons on each product page.

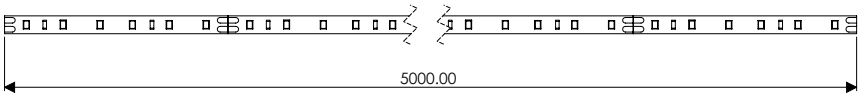
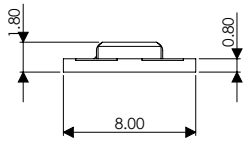
Dart

Flexible LED Strip

- A simple, highly efficient flexible strip light with superb light output
- Available in natural white making it ideal for a range of kitchen styles
- Cut marks are indicated every 100mm to enable the strip to be cut closer to the desired length
- Cut sections can be re-utilised with the joining clips and leads (sold seperately)
- 3M VHB (Very High Bond) tape underneath the strip for secure installation
- Compatible with all Sensio single-colour lighting controls
- IP20 rated - protected against solid objects over 12mm (e.g. fingers)
- Compatible with the Universal profile range
- Supplied in a 5m reel





Dart Flexible LED Strip - **Natural White (4000K), 60 LED/m**

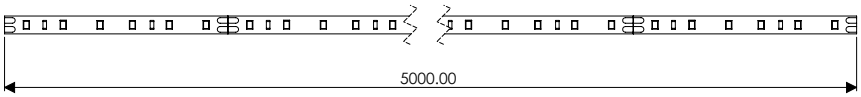
2500mm Driver Connection Cable (SE101080) is required to run the Dart (sold seperately)

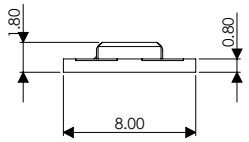
Primo 2

Flexible LED Strip

Registered Design Right - 6024616

- A versatile and economic flexible strip ideal for kitchen or bedroom use, under cabinets, along plinths or inside cabinets or wardrobes
- The entire reel can be used with cut marks indicated every 100mm avoiding wastage
- Cut sections can be re-utilised with the joining clips and leads (sold separately)
- Compatible with Sensio single-colour receivers to enable dimming functionality
- Supplied with 3M VHB (Very High Bond) adhesive tape backing for secure installation
- IP20 rated - protected against solid objects over 12mm (e.g. fingers)
- Supplied in a 5m reel





Primo 2 LED Flexible Strip - **Cool White (5000K), 60 LED/m**

Neutron

3.5mm Nano LED Flexible Strip

- The industry's smallest flexible strip measuring at only 3.5mm in width
- Ideal choice for kitchen designs where inconspicuous lighting is essential
- Highly compacted diodes greatly reduce the appearance of dots whilst providing a powerful light output
- Cut marks every 25mm enable the strip to be cut closer to the desired length reducing potential dark spots at each end
- Driver connection cables pre-soldered at either end of the strip
- Compatible with Sensio single-colour receiver to enable dimming functionality
- 3M VHB (Very High Bond) tape underneath the strip for secure installation
- Supplied in a 5m reel
- Compatible with the Nano-Lines and Micro-Lines profile ranges

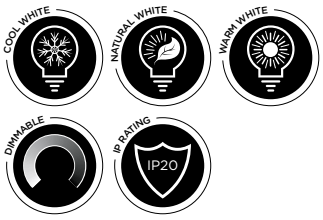
Sigma 2

Bendable LED Flexible Strip

Registered Design Right - 6024618



2500mm Driver Connection Cable (SE970850) is required to run the Sigma 2 (sold seperately)

- An innovative bendable flexible strip that handles corners with ease
- A unique PCB board cut in a ‘zig-zag’ shape provides superb flexibility allowing you to bend the light around a corner
- Can be bent around 90 degree corners without the need for corner cables or starting a new run of strip
- The entire reel can be used with cut marks indicated every 50mm avoiding wastage
- Cut sections can be re-utilised with the joining clips and leads (sold separately)
- Compatible with Sensio single-colour receiver to enable dimming functionality
- Supplied with 3M VHB (Very High Bond) adhesive tape backing for secure installation
- IP20 rated - protected against solid objects over 12mm (e.g. fingers)

The unique circuitboard design, developed by our team, allows the Sigma 2 to be installed around a flat corner. This provides an excellent solution for delivering illumination beneath worktops and plinths without shadow gaps.

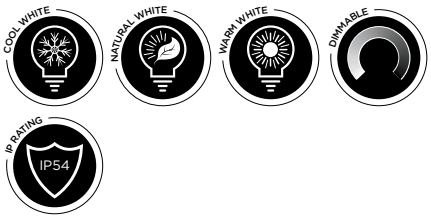
Viva 3

Flexible LED Strip



2500mm Driver Connection Cable (SE10314) is required to run the Viva 3 (sold seperately)

- A versatile flexible strip light which can be used in multiple areas of the kitchen or bedroom including under cabinet, plinths or inside wardrobes
- Male and female ends for simple installation
- Strip can be cut once and the remaining section used with a connector clip and driver lead if required
- Can be cut to length every 50mm
- Supplied with 3M VHB (Very High Bond) adhesive tape backing for secure installation
- IP54 rated - limited ingress of dust and protected against sprays from any angle
- Supplied in a 1m, 2m or 5m reel
- Compatible with the Universal Profile range

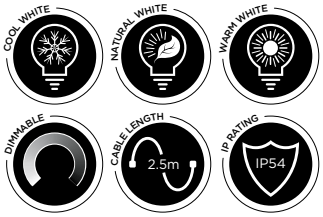
Radiant

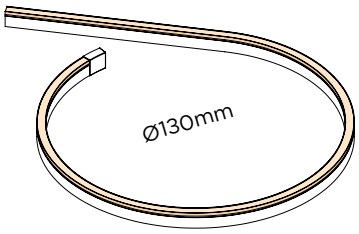
Diffused Flexible LED Strip



The indicated IP54 rating is certified to the silicone coated portion of this strip. Consult a qualified electrician to ensure correct installation near water outlets.

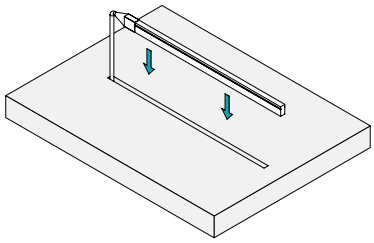
- An entirely diffused, bendable, silicone flexible strip light ideal for application across the kitchen or bedroom
- Discreet, slimline 4mm width
- Driver connection cables pre-soldered at either end of the strip so two lengths can be used from the same reel if required
- Cut marks are indicated every 50mm on the back of the strip
- Ideal for a flush, recessed finish with a simple push-fit application
- Can be surface mounted with the use of the mounting brackets
- Supplied end caps provide a clean and IP rated finish to cut ends
- Able to navigate around curves on island units and cabinetry
- Compatible with Sensio dimmable receivers

Flexible fit



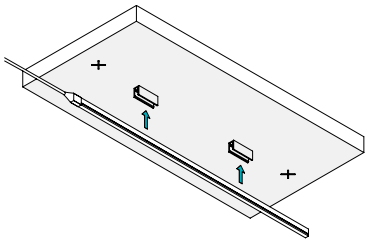
The Radiant is flexible to a radius of 65mm or greater - Ideal for curving round an island unit

Recessed installation



Install with a push-fit application into a pre-routed channel for a seamless finish

Surface mounted



Utilise the mounting brackets to secure along a surface

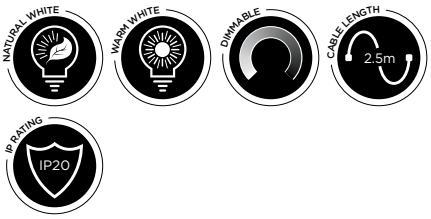
Razor

Diffused Edge-lit LED Strip



- A super-slim evolution of our fully diffused Polar COB strip.
- Thin 2mm depth creates a discreet appearance while providing superb light output
- Excellent thermal conduction resulting in a cool running strip
- 24V allows long runs of light without any light fade
- Supplied with pre-soldered, driver connection cables at both ends
- Can be cut to length (at 31mm intervals) with both ends of the strip being utilised
- Supplied with VHB tape pre-applied

A thin bead of bright, seamless illumination

Recessed in a larder

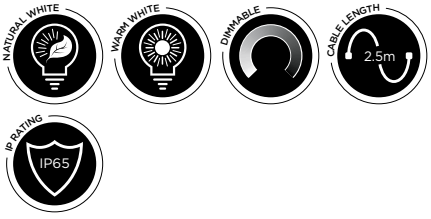
Delta

Free-Cut Recessed LED Strip

NEW



The indicated IP65 rating is certified to the silicone coated portion of this strip. Consult a qualified electrician to ensure correct installation near water outlets.

- Can be recessed with a simple push-fit application
- Able to bend around curves on the taped edge
- Cut marks every 25mm on the back of the strip
- Pre-soldered 2500mm driver connection cables with 2-pin connectors at each end of the strip
- Supplied in a 3m, 5m & 10m reel
- VHB (Very High Bond) adhesive tape backing for secure installation
- Available in Natural White and Warm white
- IP Rating: IP20

Unlit, the Delta appears as discreet as a pure white bead of silicone.

The Delta can also be easily recessed - a great solution for convenience lighting inside larders where a wider strip of illumination is desired.

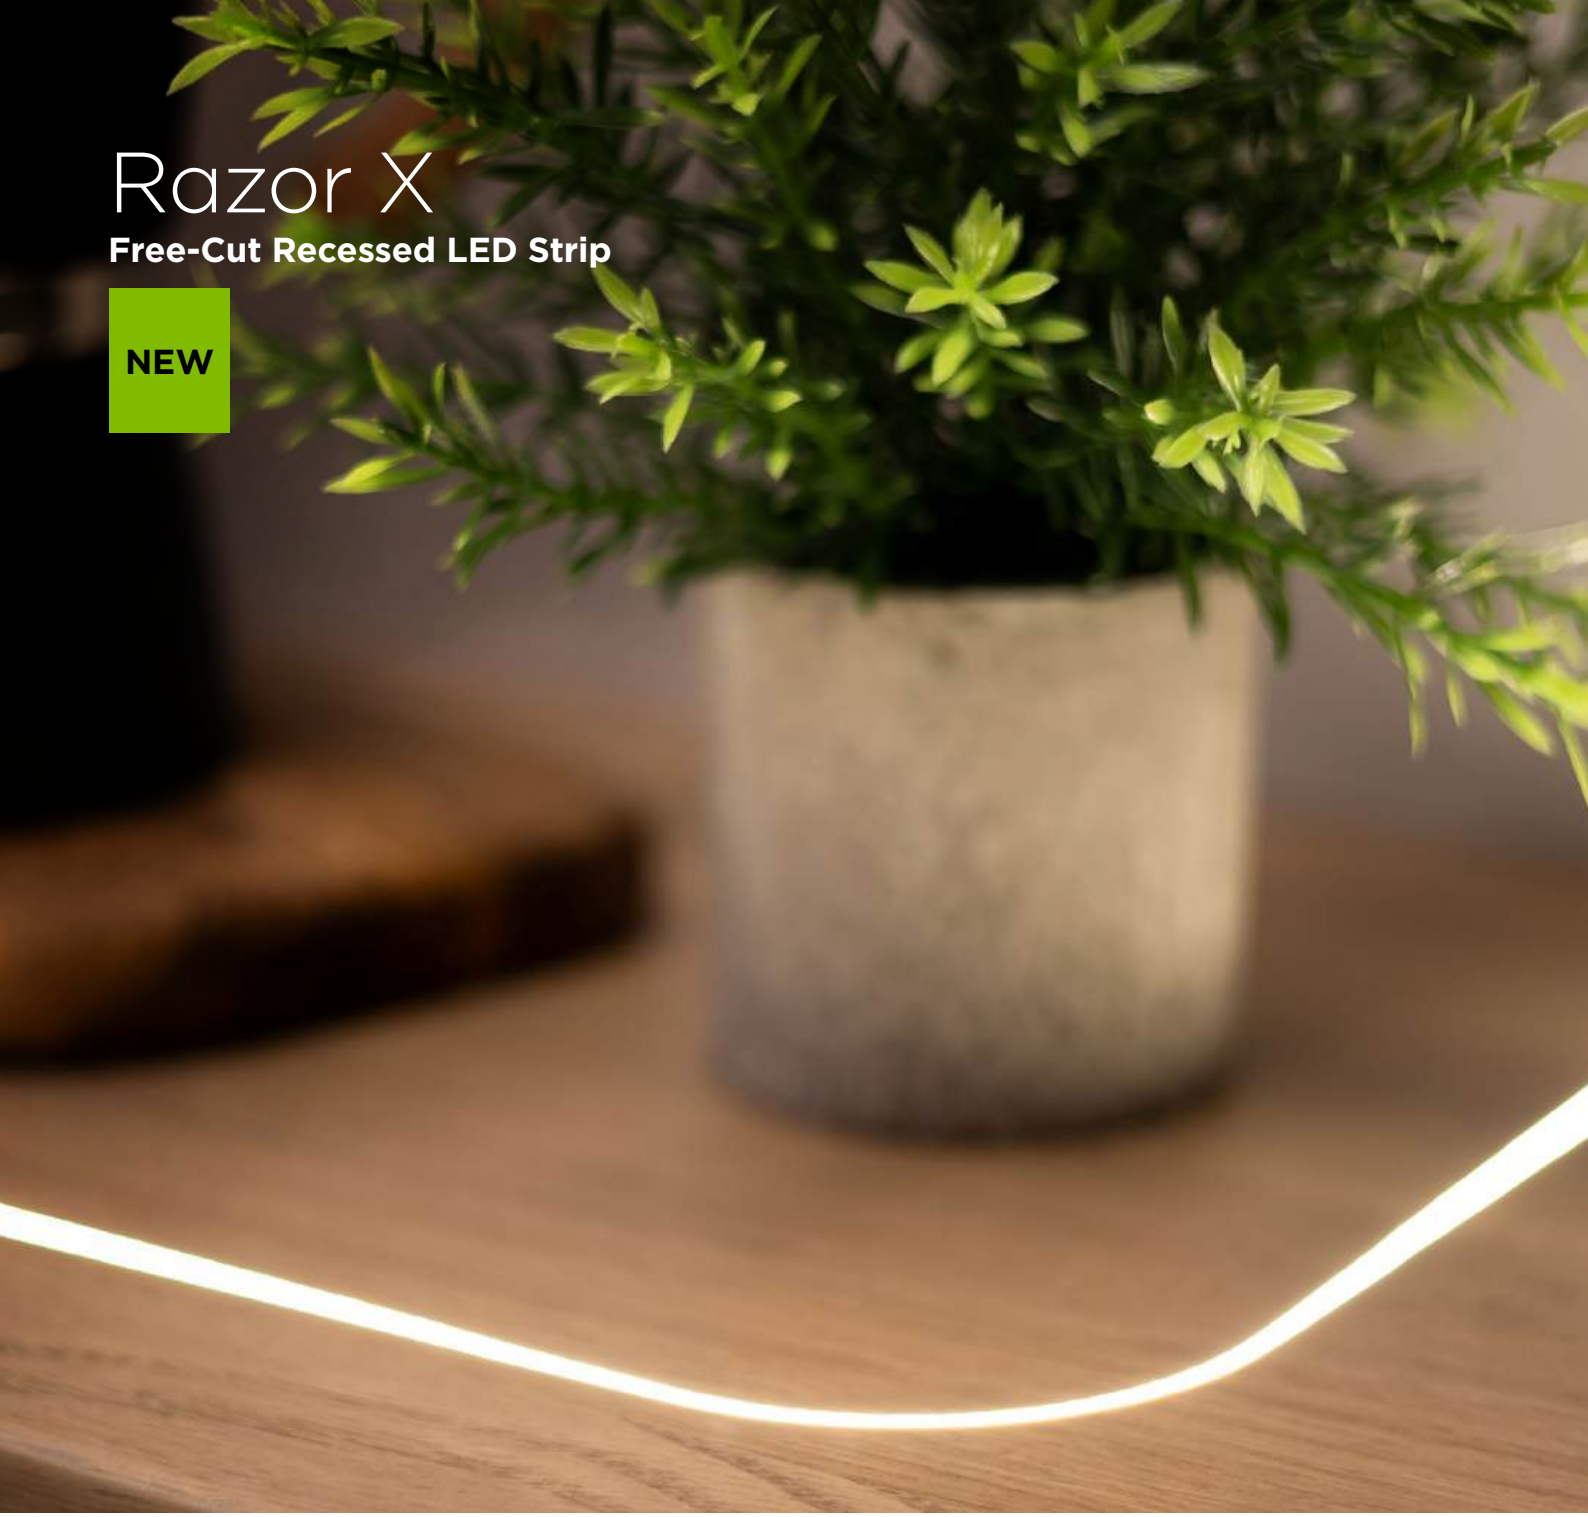
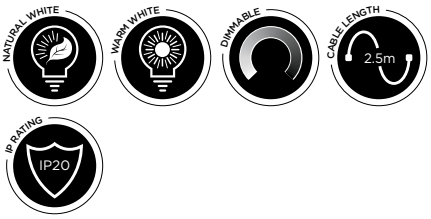
Razor X

Free-Cut Recessed LED Strip

NEW





- Can be cut to any desired length
- Pre-soldered driver connection cables at both ends
- Recessed installation can easily be made with a simple saw cut or router
- Bendable to flow around corner recesses
- No VHB adhesive tape for easy push-fit installation
- Available in Natural White and Warm White
- IP Rating: IP20
- Accessories available to utilise all cut lengths
- Pair with Edge profile, designed specifically for the Razor X strip

Cut the Razor X at any point to achieve the perfect fit.

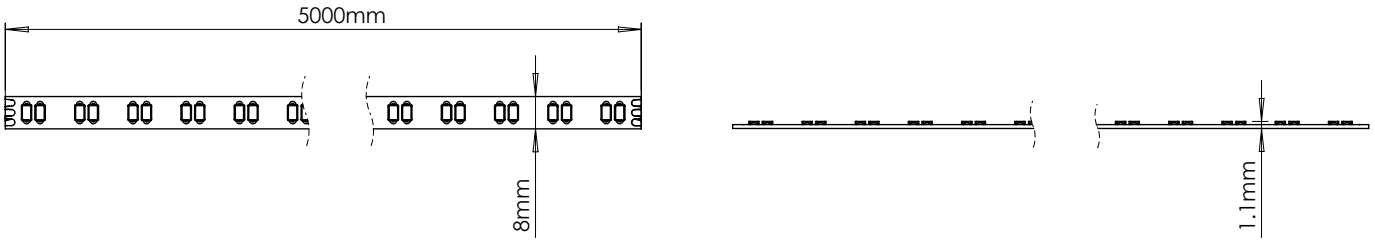
Ion 8

CCT Flexible LED Strip

- Over four times the number of LEDs per metre than it's predecessor, Ion 8 greatly reduces the appearance of visible LEDs providing a premium light output
- Correlated Colour Temperature (CCT) allows the perfect light temperature selection and transition from warm to cool white temperatures
- Can be cut to length (every 50mm) and the whole reel can be utilised with the Ion Joining Clips (sold separately)
- Compatible with Sensio CCT Receiver and Universal Remote Control or the Titan Smart Kinetic Driver to control, zone and dim the lights
- VHB (Very High Bond) adhesive tape backing for secure installation
- Supplied in a 5m reel
- Compatible with the Universal Profile range



Ion 8 CCT LED Flexible Strip - **(2700K-6000K), 252 LED/m**

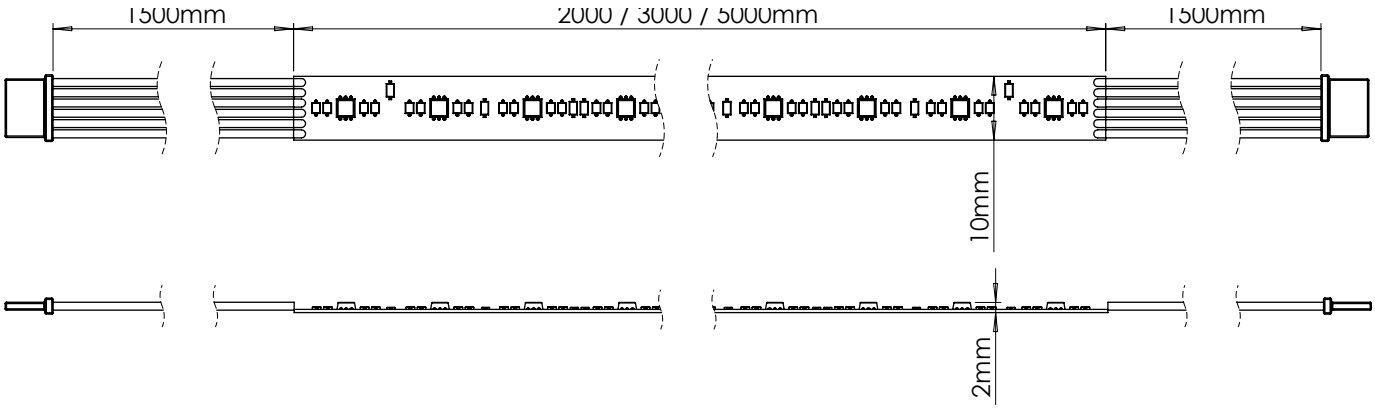
Flux

RGB CCT LED Flexible Strip

- A fully customisable, flexible strip light to suit any style, mood or atmosphere
- A combination of RGB and CCT provides the ultimate colour changing solution enabling colours to be mixed and matched to create millions of combinations
- Features 24 pre-set RGB colours and 11 shades of white (CCT)
- Colours can be set individually or RGB colours can be mixed with the CCT colours to create a multitude of different shades
- Each colour can also be dimmed to achieve further customisation
- A high number of LEDs per metre significantly reduces the appearance of individual LEDs
- Compatible with Sensio CCT Receiver and Universal Remote Control or the Titan RGBCCT Smart Driver to control, zone and dim the lights*
- Cut marks are indicated every 142.5mm on the back of the strip
- VHB (Very High Bond) adhesive tape backing for secure installation
- 5m reel supplied with driver lead attached to both ends (2m reel with lead at one end only)
- Compatible with the Universal Profile range



Mode CCT

Mode RGB

Set to one of multiple colour options with a full range of RGB and cool to warm white

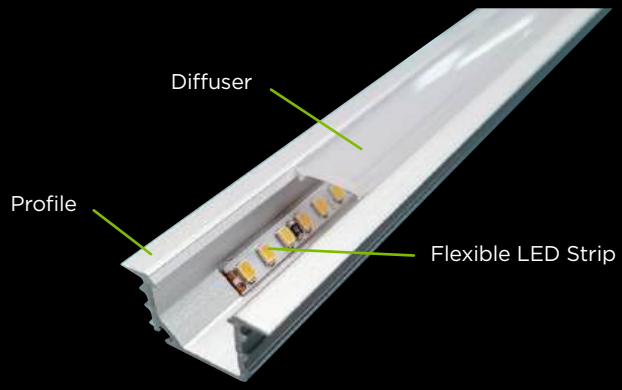
PROFILES & INTEGRATED SOLUTIONS

- Profiles coupled with flexible strips offer a non-intrusive way of lighting the kitchen while enhancing the overall design
- Perfect for creating a flush, sleek look
- Creates fully diffused expanses of light without visible light diodes
- Simple to use and install, the versatility of flexible strip lighting makes it suited to a range of applications across the kitchen and using one of our Profiles increases the possibilities even further.

Profiles offer an extended range of options for flexible strip installation

All of our profiles feature a diffusing cover to remove the visibility of LED dots and provide a soft, even spread of light.



Nano

Blaze, Gamma & Ray (to fit 3.5mm flexible strips)

Consisting of a recess mounted option and two surface mounted options, the Nano range has been cleverly designed to fit a 3.5mm wide flexible strip mounted on a 45° angle. This not only achieves a 100% diffused appearance with no visible diodes, it's also the key to the innovative corner connectors available for each profile, which enable the strip to pass through to achieve fully illuminated corners.

Micro

Vector, Accent, Adapt & Glow (to fit 5mm flexible strips)

Consisting of four profiles purposely designed for flexible strips 5mm in width or below, the Micro range is a diverse range of slim profiles intended to illuminate every area of the kitchen. Innovative features appear throughout the range including living hinges, illuminated corner connectors and versatile mounting brackets and each profile has been carefully designed to achieve a 100% fully diffused appearance with no visible diodes.

Universal

Adorn, Contour, Linia, Fino & Beam (to fit all flexible strips up to 10mm)

A universal range of profiles designed to fit any of the Sensio range of flexible strips. Includes recessed, surface mounted and angled installation as well as a profile specially designed to illuminate the handleless channel under a worktop.

	PROFILE	STYLE	TYPE	APPLICATION	COMPATIBLE FLEX STRIPS

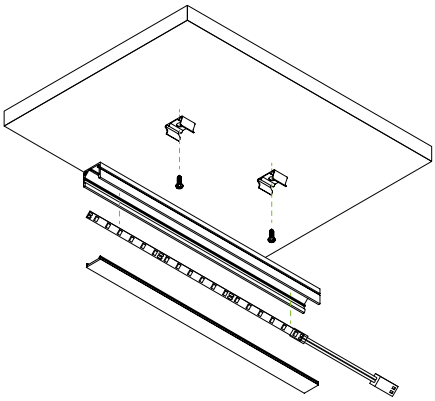
Gamma

Slim Surface Mounted Profile

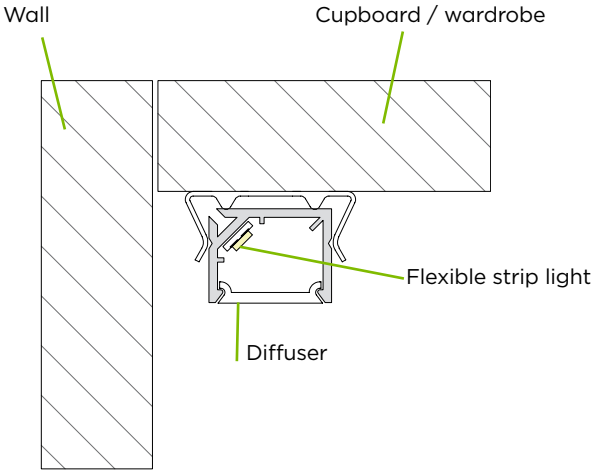
Registered Design Right - 6077037

- Designed specifically for the 3.5mm wide Neutron flexible strip - part of the Nano-Lines range of super slim lights and profiles
- An incredibly thin profile that produces an even spread of light with no visible LED points from the flexible strip
- Perfect for use under cabinets, in larders or wardrobes
- Features an internal angled flexible strip mounting platform enabling the strip to extend around corners when paired with the corner connectors resulting in a fully illuminated light circuit with no dark corners
- Simple push-fit installation with brackets
- Can be cut to size
- Supplied with one set of end caps (additional end caps sold separately)
- Supplied with VHB (Very High Bond) adhesive tape backing for secure installation

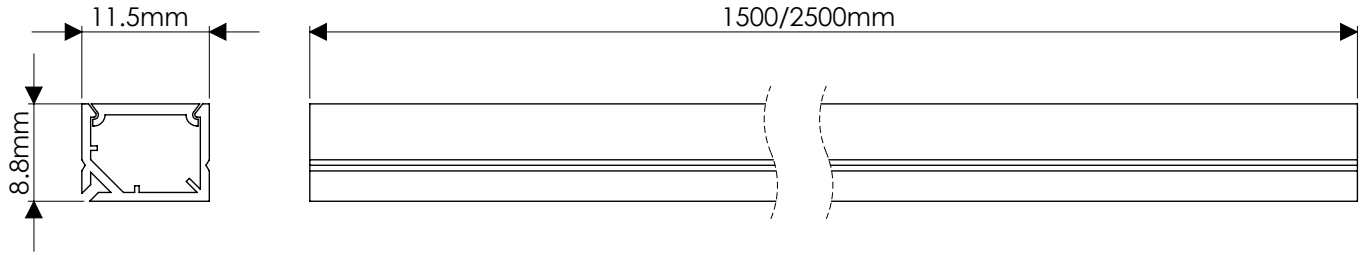
Application



Stick the flexible LED strip inside the profile with the pre-applied 3M VHB tape. Slide on the cover and slot in the end caps. Push the profile into the the mounting brackets to hold in place.



The flexible strip sits along the back corner of the profile, emitting light downwards through the diffuser.



Compatible with Neutron Flexible Strip

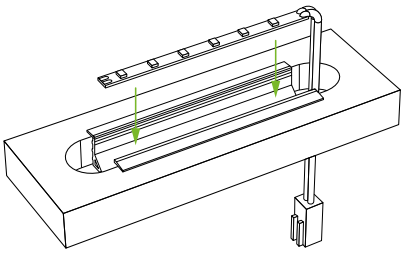
Blaze

Slim Recessed Profile

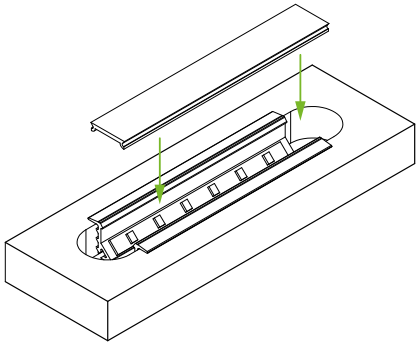
Registered Design Right - 6077034

- Designed specifically for the 3.5mm wide Neutron flexible strip - part of the Nano-Lines range of super slim lights and profiles
- An incredibly thin, diffused profile that produces an even spread of light with no visible LED points from the flexible strip
- Suitable for a range of applications in the kitchen and bedroom including wardrobes and cupboards
- The flexible strip mounting platform is angled to enable the flexible strip to extend round corners when paired with the Blaze corner connectors
- Fully diffused corner connectors result in a fully illuminated light circuit with no dark corners
- Simple push-fit installation
- Wide wings cover any router imperfections
- Can be cut to size
- Supplied with one set of end caps (additional end caps sold seperately)

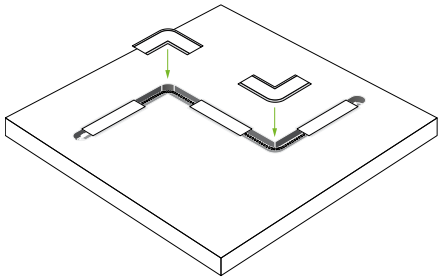
Application



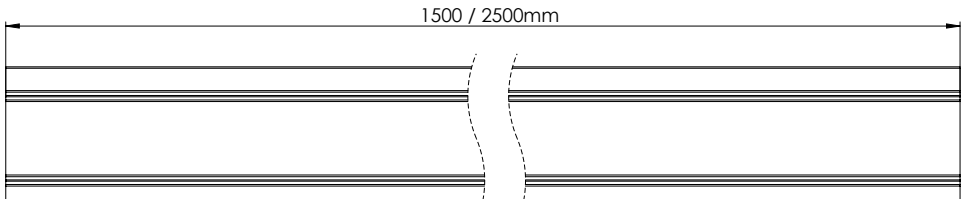
The Blaze profile sits into a pre-routed channel, with the strip's power cable concealed by feeding through behind the surface.

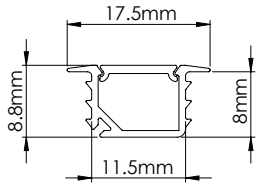


Simply click the diffused cover into place, creating a seamless line of light along the surface.



Use the additional corner accessories to create unique channel paths and guide the light around corners.





Compatible with Neutron Flexible Strip

Accent

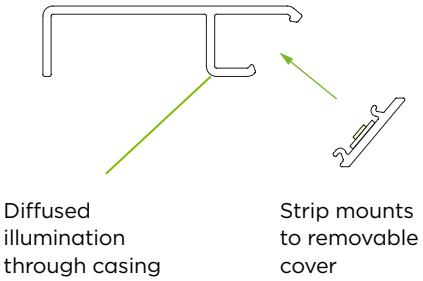
Plinth Profile

Registered Design Right - 6077029

- Designed for mounting flexible strip lighting along plinth boards
- Features an internal angled flexible strip mounting platform enabling the strip to extend around corners when paired with the corner connectors resulting in a fully illuminated light circuit with no dark corners
- The angled flexible strip mounting platform ensures the diffusion of individual LED points, as well being removable for ease of installation and serviceability
- Part of the Micro-Lines range exclusively designed for flexible strips 5mm in width or below
- Fits 16-18mm plinth boards
- Can be cut to size
- Supplied with 2 end caps (additional end caps sold separately)

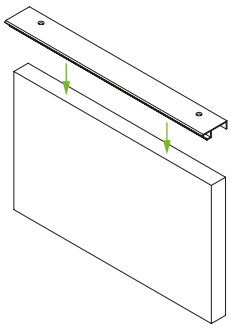
Application

1. Plinth top design



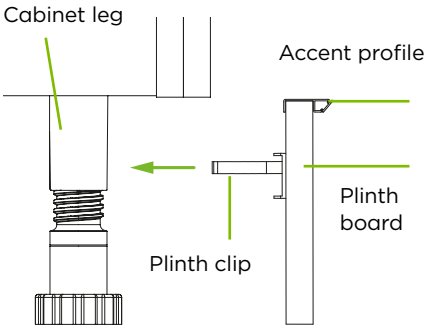
The Accent provides a discreet and fully diffused solution to mount a micro LED flexible strip to the plinth board, with a simple push fit design

2. Fit the Accent atop the plinth

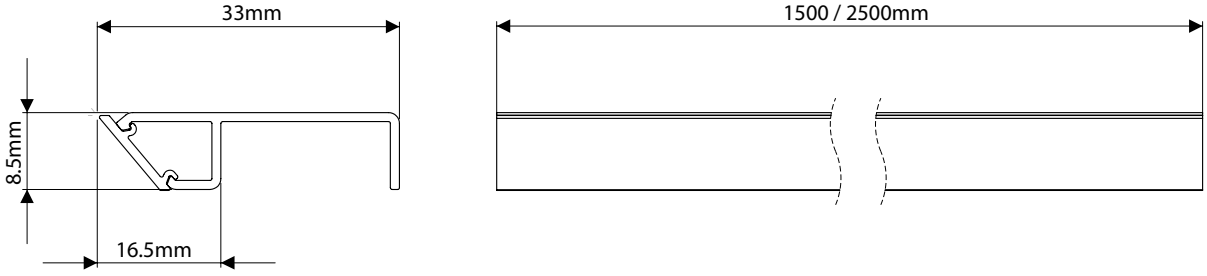


Mount the profile by pushing the U-shaped section over the top of the plinth board. Connectors are available to extend the light around corners.

3. Attach the Plinth



Clip the plinth board into position under the base units.



Compatible with the Ion 5 or Neutron Flexible Strip

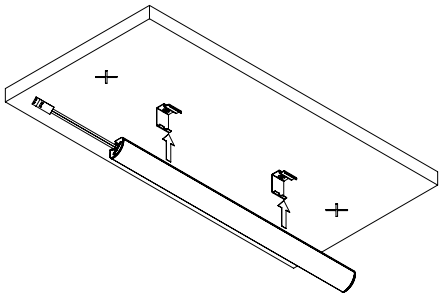
Adapt

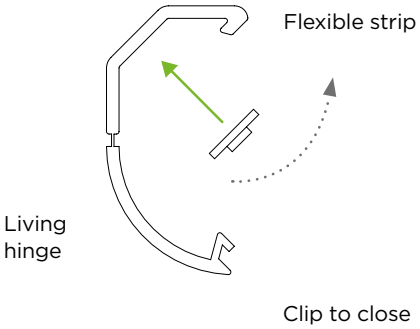
Corner & Drawer Profile

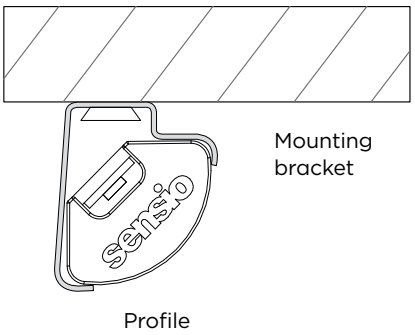
Registered Design Right - 6077033

- A corner profile perfect for installation under cabinets, shelves or inside larder units or drawers
- Part of the Micro-Lines range of profiles which have been designed for flexible strips that are 5mm in width or below
- Features an innovative living hinge allowing the two parts of the profile to stay attached when the flexible strip is installed and making it simple to clip the two sections back together
- Fully diffused resulting in an even spread of light with no visible LED points from the flexible strip
- Can be cut to size
- Supplied with 2 end caps (additional end caps sold separately)
- 1500mm supplied with 2x mounting brackets and 2500mm supplied with 4 mounting brackets
- Drawer mounting brackets sold separately

Application







The Adapt shines light down and forwards. Simply cut to length, fit the flexible strip inside, click the cover closed and slot in the end caps. Push the profile housing into the the mounting brackets to hold in place.

The Adapt is one simple unit with a diffused cover which clicks open and closed.

Glow

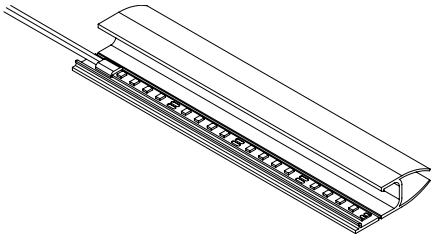
Glass Shelf Clip Profile

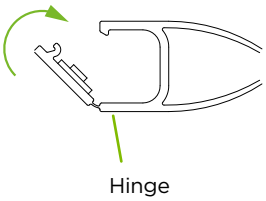
Registered Design Right - 6077032

- An inconspicuous solution to transform the appearance and functionality of feature cabinets as well as practical convenience lighting to locate items in a cupboards
- Part of the Micro-Lines range of profiles which have been designed for flexible strips that are 5mm in width or below
- Emits relaxing mood lighting that flows out into the kitchen when used on glass feature shelves
- Features an innovative living hinge allowing the two parts of the profile to stay attached when the flexible strip is installed and making it simple to clip the two sections back together
- Can be cut to size
- Fits 4-8mm glass shelves
- Attaches to the back of the shelf with a simple push-fit

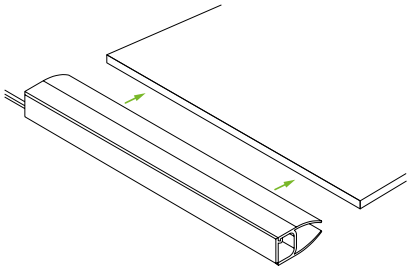
Application

Apply the flexible LED strip to the rear flap on the Glow profile, which then simply folds to click shut - positioning the light shining directly forward through glass shelving.

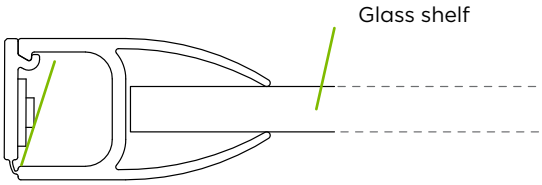


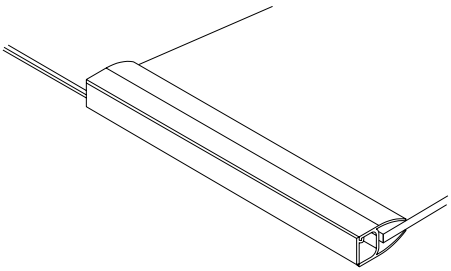


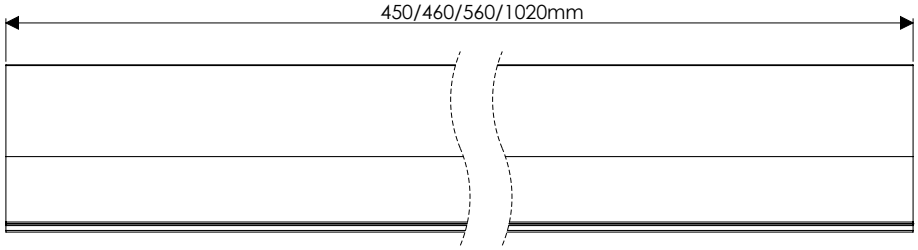
The front of the profile features a flexible grip to fit shelving from 4-8mm thick. Simply slot the Glow profile onto the back of the shelf.

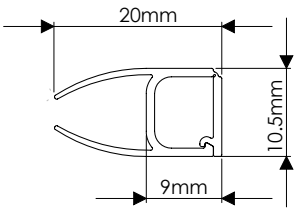


Flexible strip (not included)









Compatible with the Ion 5 or Neutron Flexible Strip

Glow - **Glass Shelf Clip Profile**

CODE	DESCRIPTION	LENGTH
SE190790	Shelf Clip Profile	1000mm

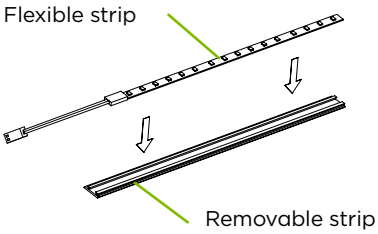
Vector

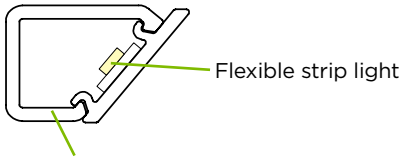
Slim Handleless Profile

Registered Design Right - 6077023

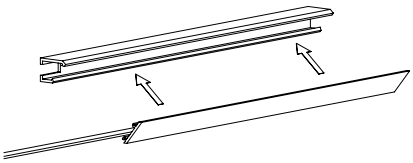
- The ideal lighting solution for contemporary handleless kitchens
- Subtle and unobtrusive whilst emitting a powerful source of mood lighting
- Part of the Micro-Lines range of profiles which have been designed for flexible strips that are 5mm in width or below
- Provides protection of the flexible strip light when hands go to open drawers and cupboards
- Features an angled light source that guarantees the diffusion of individual LED points
- Removable strip mounting plate for ease of installation and serviceability
- Fully diffused corner connectors result in a fully illuminated light circuit with no dark corners
- Can be cut to size
- Attaches inside the handlesless channel with VHB tape

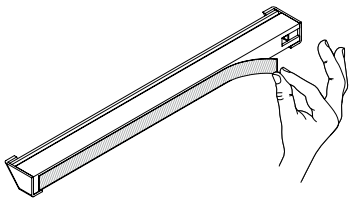
Application

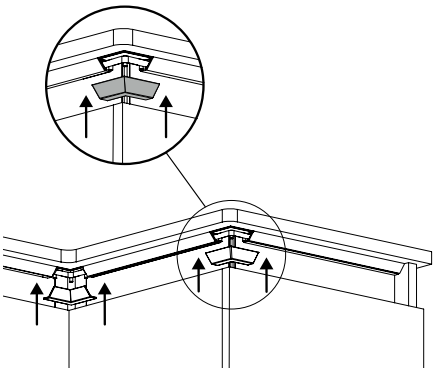




Light emits back out underneath, through the diffused casing



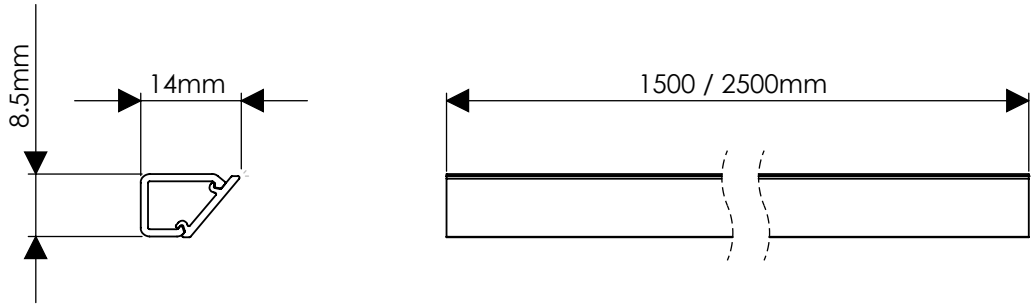




The small form factor of the Vector profile discreetly installs under the worktop edge. Apply a flexible LED strip along the removable panel then click back into place.

Installation is simple peel and stick with the pre-applied high bond backing tape.

Build the lighting run using the additional range of corner accessories available to guide continuous illumination around the edge of units.



Compatible with the Ion 5 or Neutron Flexible Strip

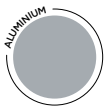
Adorn

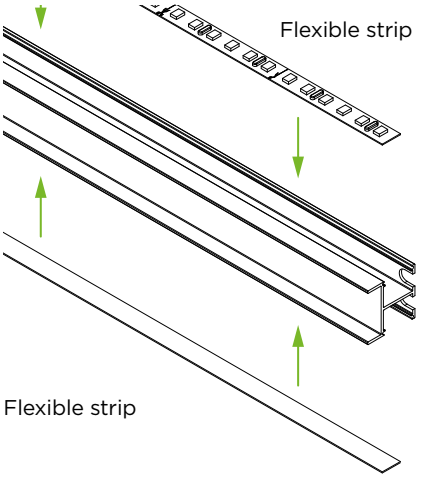
Wood Shelf Clip Profile

Registered Design Right - 6077040

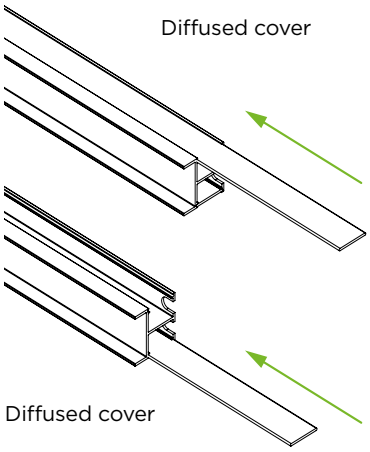


- A discreet profile that clips on to the back of an internal cupboard shelf
- Features upwards and downwards facing light sources to illuminate the cupboard
- Part of the Universal range of profiles which are compatible with any of the Sensio flexible strip range
- Features a U-shaped channel that clips around wooden shelves
- Fits 18mm wooden shelves
- Can be cut to size
- Attaches to the shelf with a simple push-fit

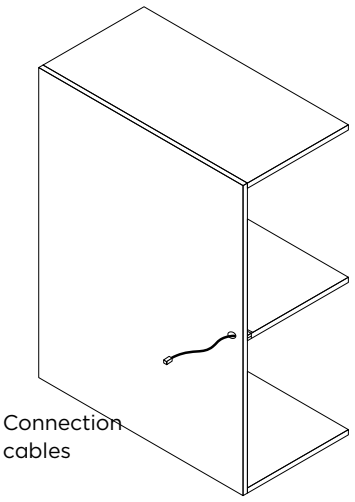
Application



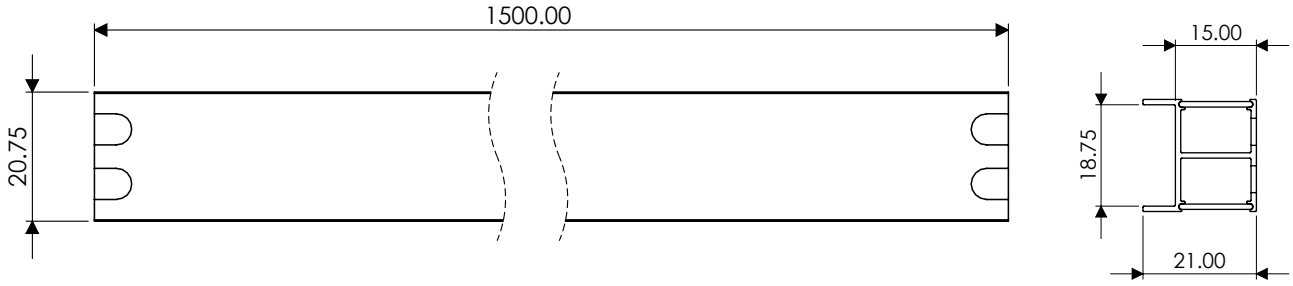
Illuminate both above and below the shelf. Simply lay separate lengths of the flexible LED strip into either side of the dual channel design.



The diffused covers slide into place over each channel to provide symmetrical, even lighting up and down the back of the cabinet.



Discreetly power the flexible strips by passing the connection cables through the back of the cabinet and concealing a slimline Titan driver behind.



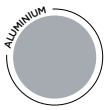
Compatible with all flexible strips

Adorn - **Wood Shelf Clip Profile**

CODE	LENGTH	DESCRIPTION
SE190720	1000mm	Shelf Clip Profile

Beam

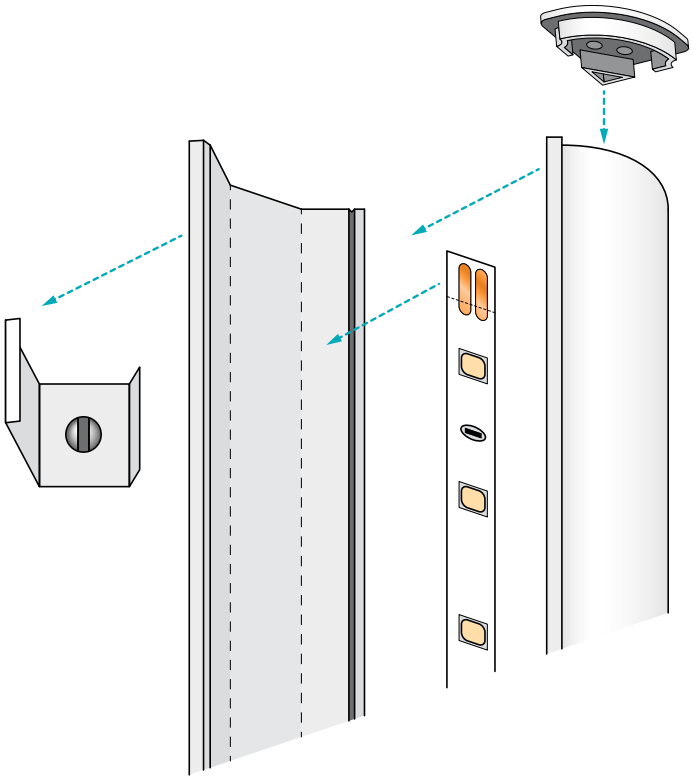
Angled Profile



- Angled profile ideal for illuminating cupboards or larders providing an even spread of diffused light
- Part of the Universal range of profiles which are compatible with any of the Sensio flexible strip range
- Light grey finished end caps
- Supplied with one cut out end cap to feed cables through and one with no cut-out for a neat finish
- Opal PC cover to diffuse the LED points
- Mounting brackets and end caps supplied with each profile (2 brackets with 1000mm & 4 with 2200mm)
- Additional mounting brackets and end caps sold separately

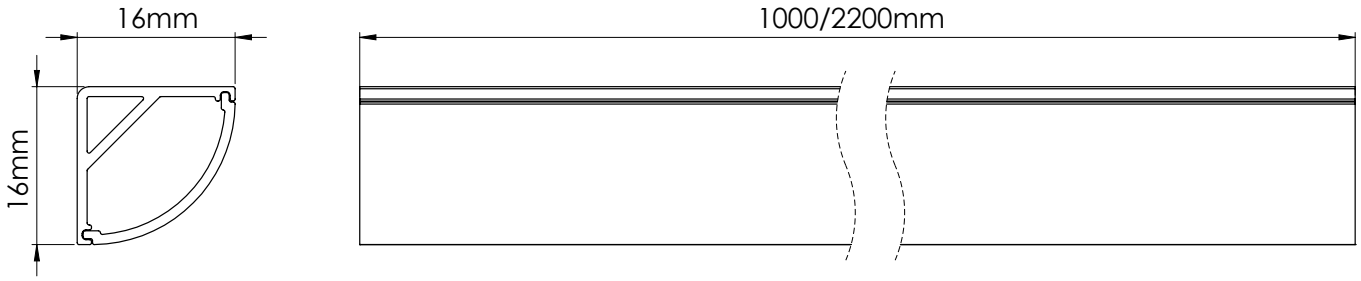
Application

1: Supplied mounting brackets are measured and secured into place in the corner



3: The removable arched cover and end caps slot into place to provide a seamless finish and diffused lighting

2: LED strip applies to the inner base of the profile channel and the Beam then slots into the place in the brackets



Compatible with all flexible strips

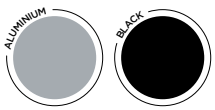
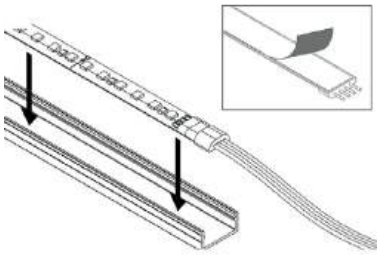
Fino

Surface Mounted Profile

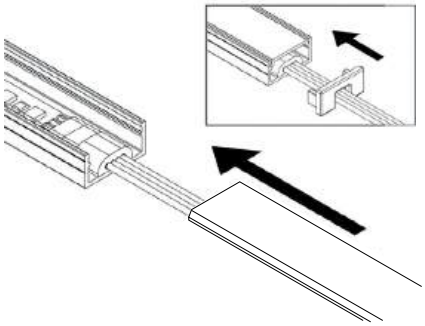


- Perfect for use inside cabinets, larders or wardrobes
- Part of the Universal range of profiles which are compatible with any of the Sensio flexible strip range
- Diffusing cover to disperse the LED points and create a soft, even glow
- Simple surface mounted application
- Mounting brackets and end caps supplied with each profile (2 brackets with the 1000mm and 4 with the 2000mm)
- Additional mounting brackets and end caps sold separately
- Available in both an aluminium and a black finish

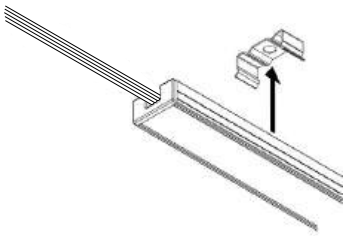
Application



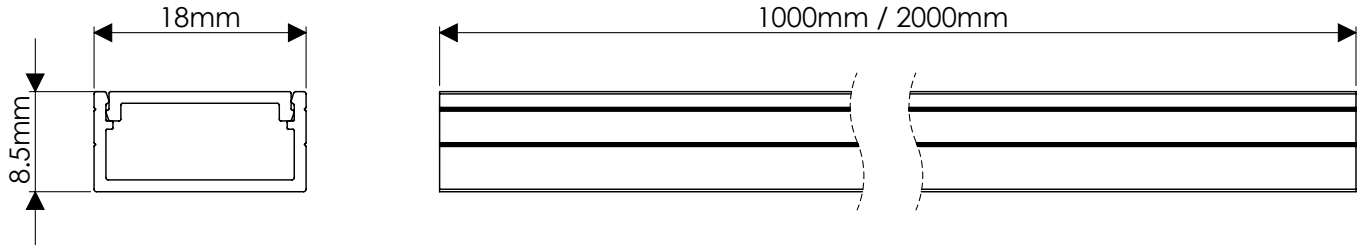
1: The Fino accepts all felxible strips. Cut the aluminium profile and strip to length, then apply the strip into the base of the channel.



2: Side the diffusing cover into place and then slot in the end caps, taking care to use the notched endcap over the power cable.



3: The mounting brackets are secured to the surface where the profile is to be installed and then the Fino simply pushes into the brackets to secure.



Compatible with all flexible strips

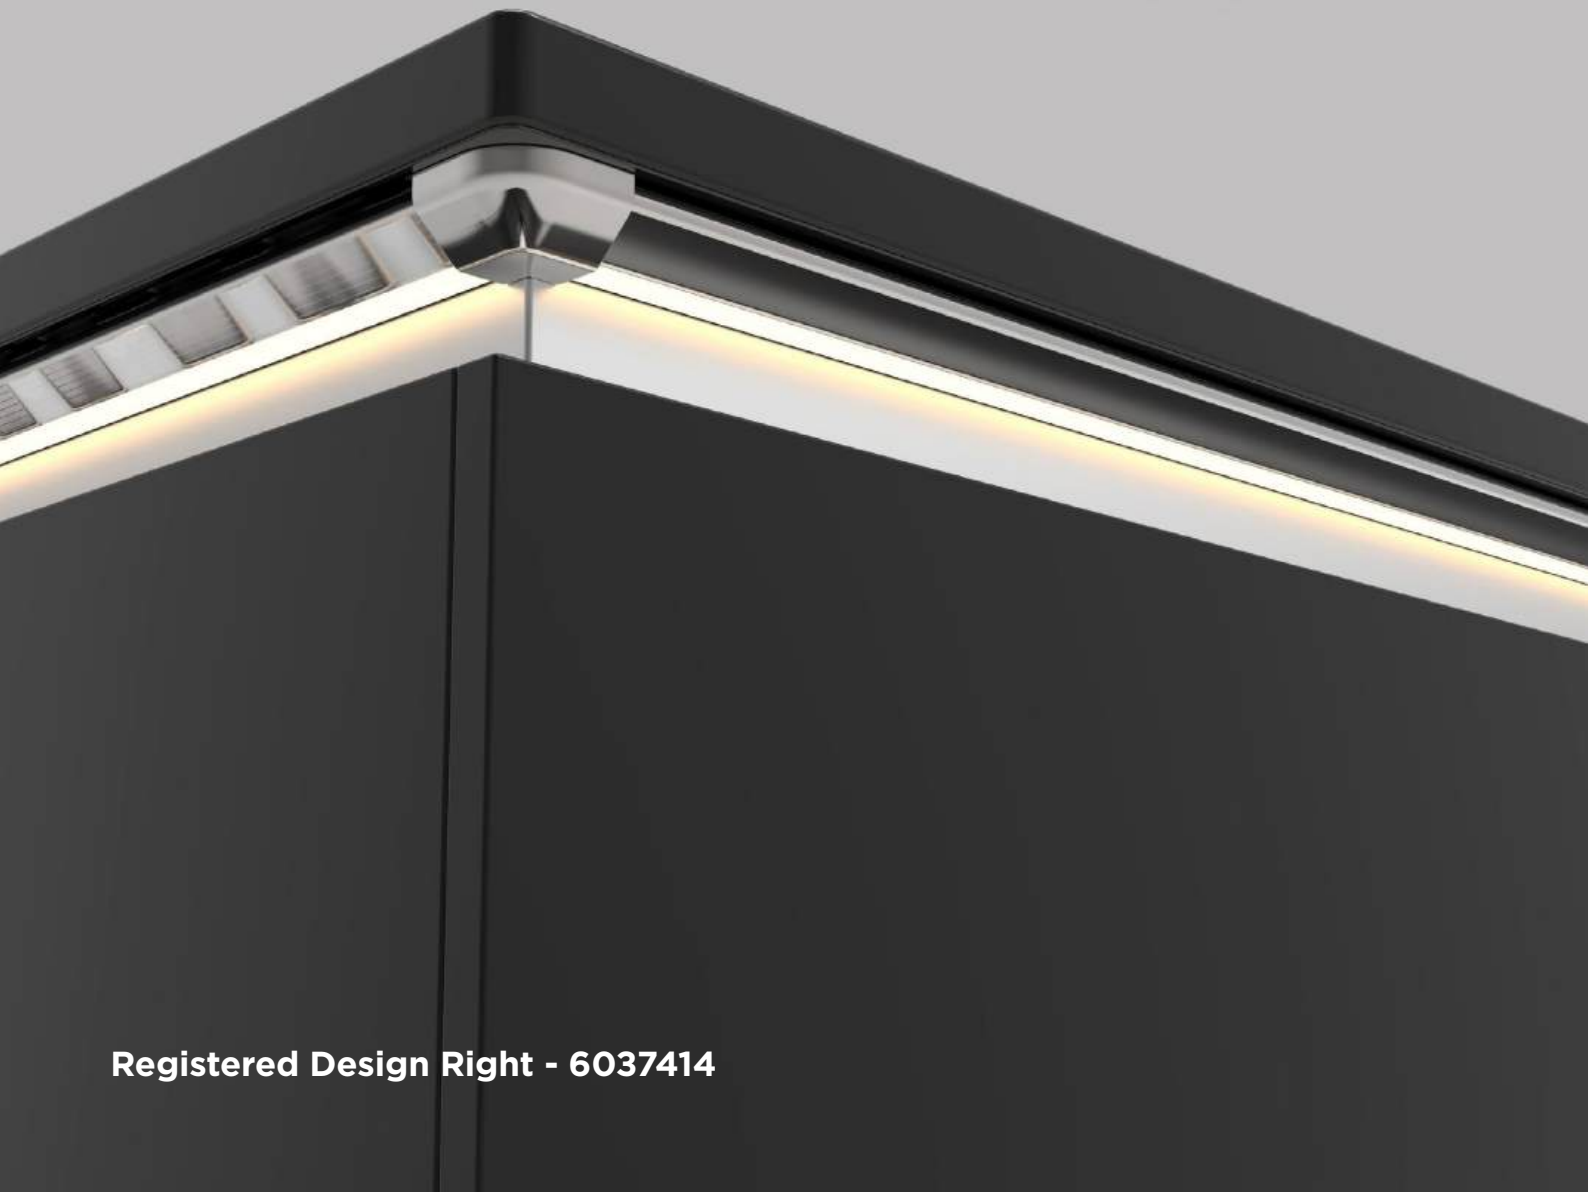
Contour

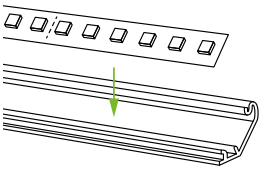
Under Worktop Handleless Profile



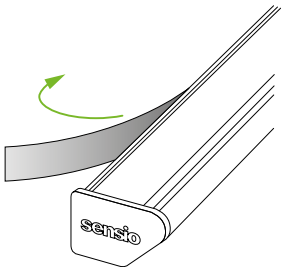
Registered Design Right - 6037414

- Designed to sit just below the lip of the worktop to illuminate the handleless channel
- Provides protection of the flexible strip light when hands go to open drawers and cupboards
- Produces an even spread of light with no visible LED points from the flexible strip
- Part of the Universal range of profiles which are compatible with any of the Sensio flexible strip range
- Supplied with 2 end caps (additional end caps sold separately)
- Corner connectors sold separately

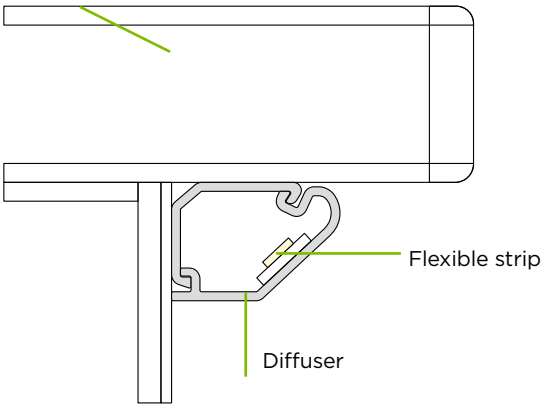
Application



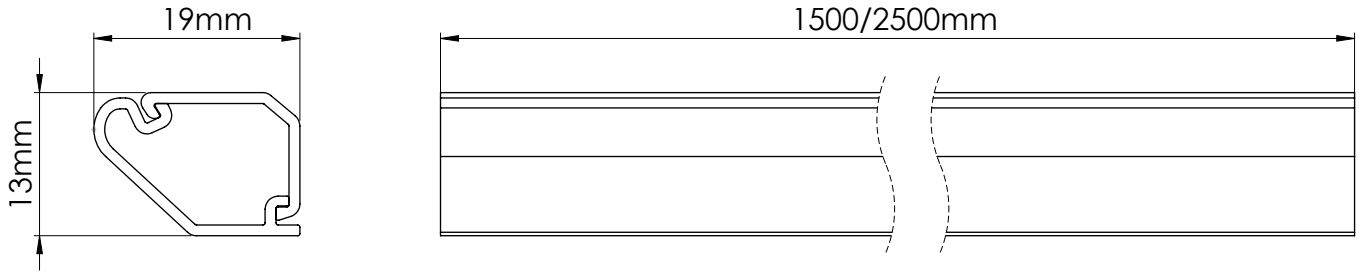
The front panel of the Contour removes to allow the easy installation of the flexible strip.



The profile mounts into place with a simple peel and stick using the pre-applied, high bond adhesive backing.



Light from the flexible LED strip is emitted inside the profile and then reflected down through diffused lower panel, eliminating the visilibility of LED dots and providing a soft continuous glow.



Compatible with all flexible strips

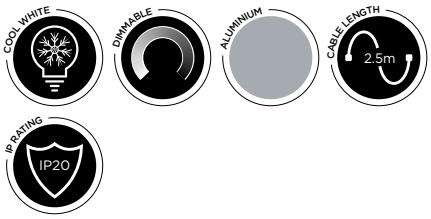
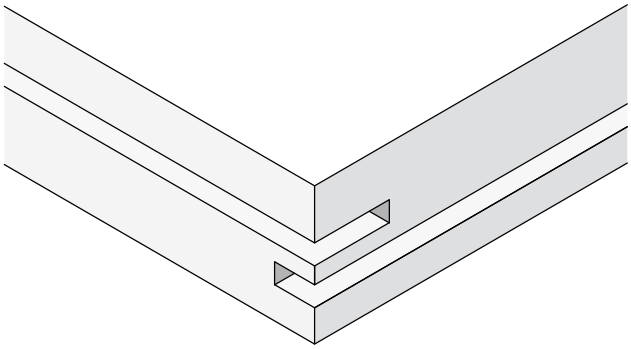
Manta

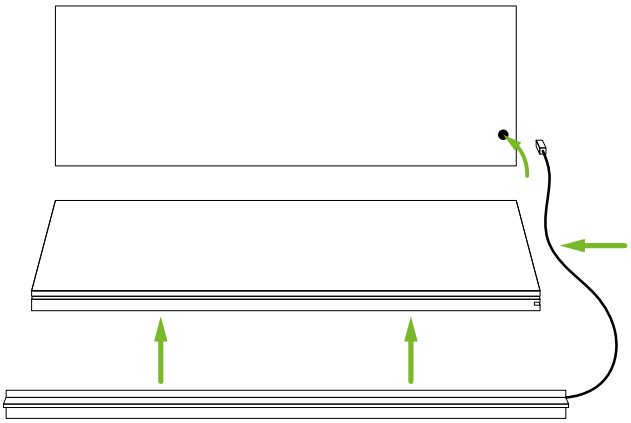
Integrated Handleless Profile



- A truly integrated lighting profile for handleless kitchens, lighting both through the top and bottom of the profile
- Pre-fitted cool white flexible strip
- Installed on the front edge of the internal cupboard base shelf/panel or in the handleless channel to illuminate both inside the cupboard and down to the worktop
- Diffused cover ensures and even spread of light and no visible LED points
- Compatible with with Sensio single-colour receiver to enable dimming functionality
- Available in 4 lengths

Application





The Manta is designed to mount directly to the front of a base panel with a simple push-fit. Two channels are routed into the base panel. One along the front edge and a second down the side edge.

Slot the Manta profile into the front channel. Tuck the power cable neatly down the side and through the back. Power can be dicreetly supplied with our slimline Titan driver concealed behind or on top of the cabinet.

Dual, diffused lighting illuminates both above, into the cabinet and below, onto the kitchen worktop. Replaces the existing fitting on handleless base panels.

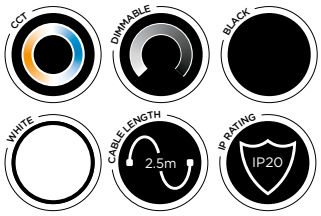
Flex with Polar X Pro

Illuminated Silicone Profile for Recessed Installations

NEW

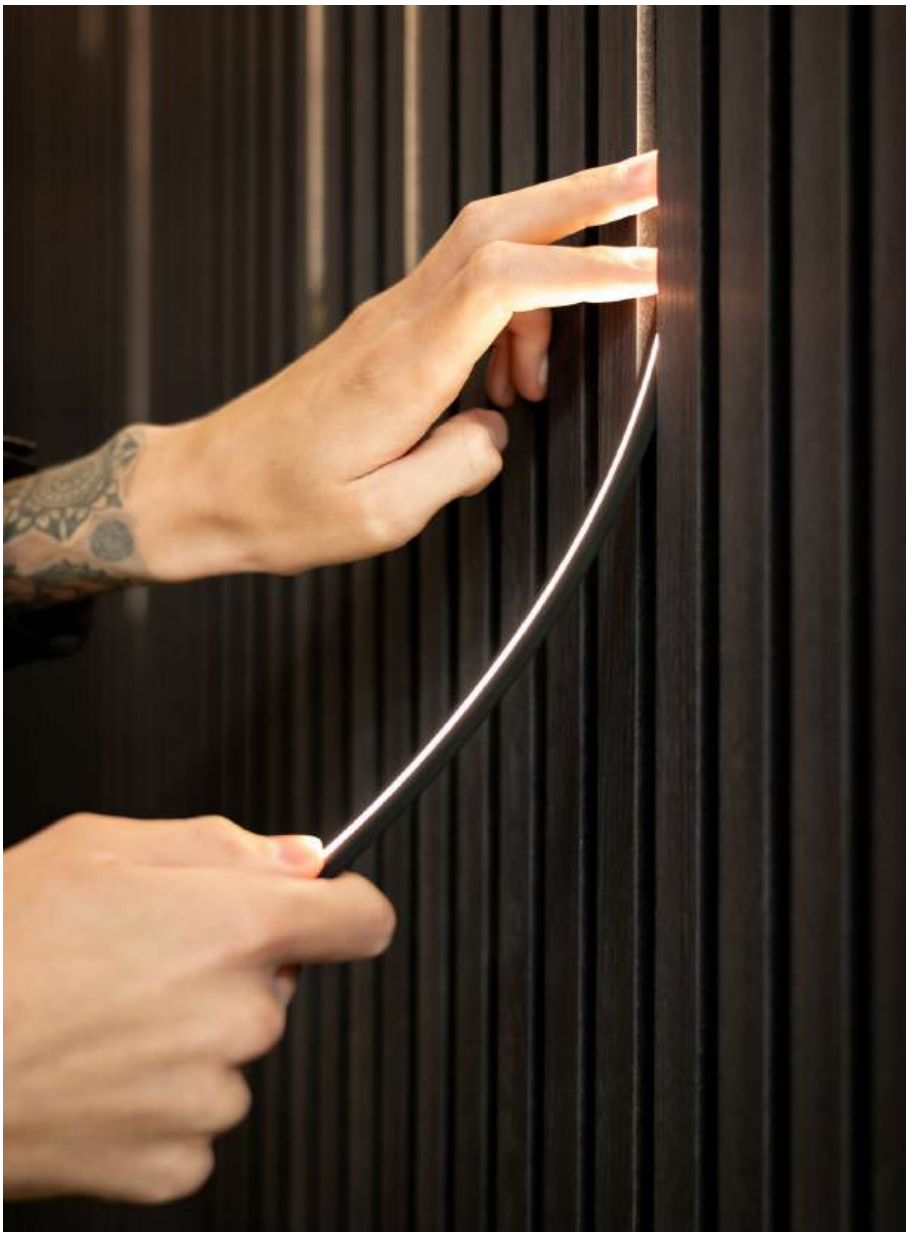


The Flex is a truly innovative all in one solution. Featuring a flexible silicone profile with Polar X Pro CCT LED strip built in, which can be cut at any length. Designed for use in acoustic panels and recessed installations, this easy to install product offers a discrete and seamless finish. Unlike rigid profiles, the Flex is supplied on a coiled reel saving on transportation cost and space.

- Easy push-fit installation
- Winged option available to sit flush on any surface
- Can be cut to any desired length
- In-built Polar X Pro flexible strip
- CCT - Correlated Colour Temperature
- 24V allows long runs of light without any light fade
- Compatible with Sensio CCT Receiver and Universal Remote Control or the Titan Smart Kinetic Driver to control, zone and dim the lights
- Supplied in a 5m reel
- Available in two different finishes; Black and White
- IP Rating: IP20

The Flex installs beautifully in trending acoustic panels with simple push-fit installation. When unlit, the silcone case is discreet and unobtrusive.

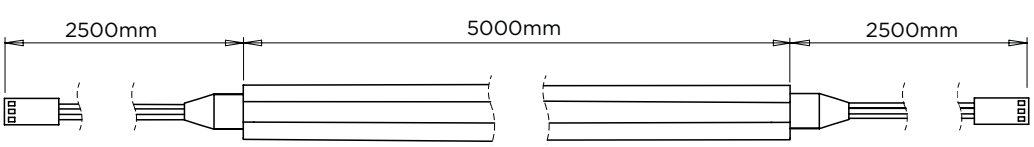
Polar X Pro inside the Flex, brings the ability to cut the profile to any length. Connect power using the existing Polar Pro accessories to get multiple runs from one reel, or get creative by cutting different lengths.

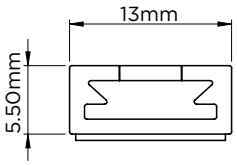


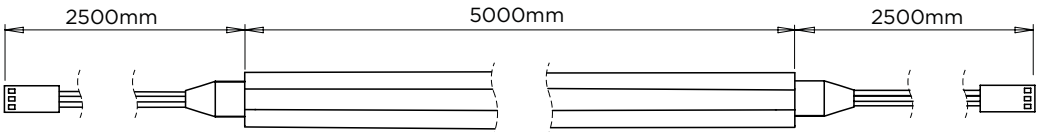
Style choices - Our surface mount edition will push to the back of the channel in an acoustic panel, creating a more discreet effect. Whereas the winged model sits flush to the front for more prevalence when illuminated.

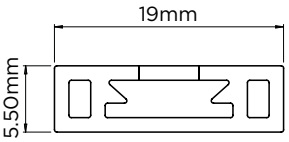
Surface mount edition - Supplied with VHB tape applied for efficient application. Simply cut to length then connect the power.

Recessed winged edition - Designed to conceal router imperfections and for a flush surface finish.









Flex with Polar X Pro - **Surface Mount or Recess | CCT 2700-6500K | 512 LED/m**

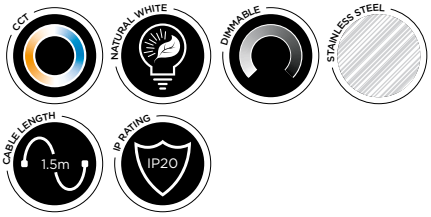
Expanse Pro / Expanse

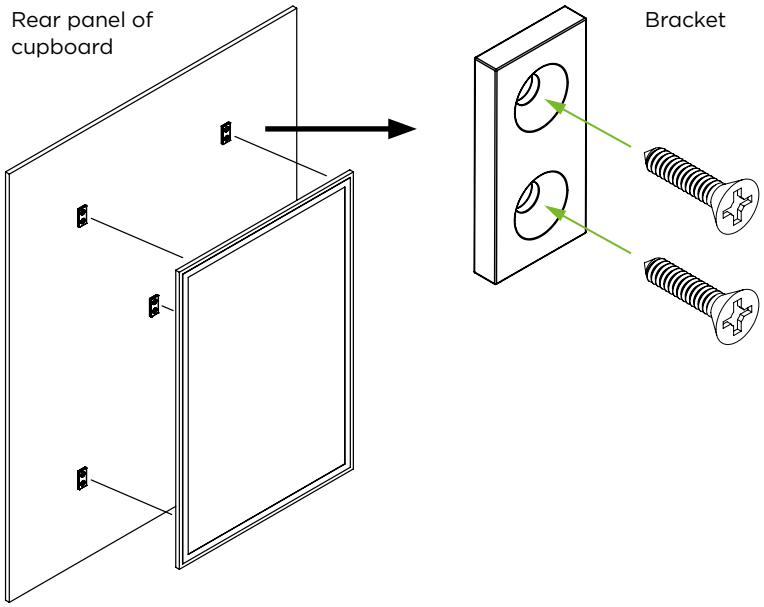
LED Illuminated Back Panel

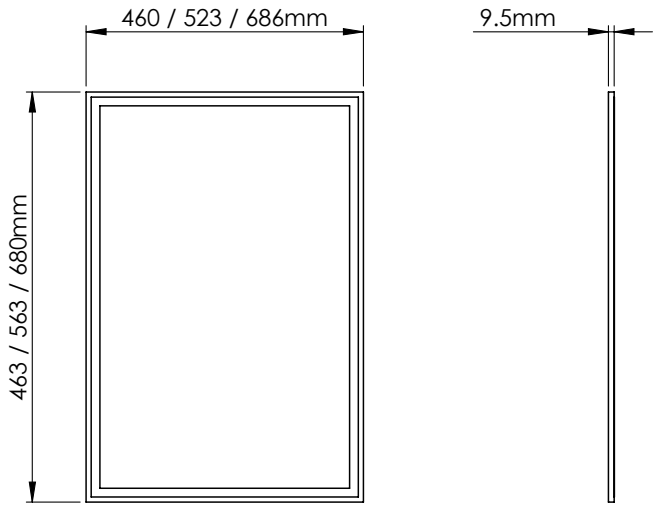


- Perfect for creating a showcase of glass-fronted cabinets or flooding cupboards with light
- Installs into the back of wall units with magnetic fixing brackets
- Correlated Colour Temperature (CCT) allows the perfect light temperature selection and transition from warm to cool white temperatures (find out more on p17. (Also available in single-colour natural white)
- Fully diffused light – no visible diodes
- Provided with pre-connected lead to connect directly into the driver

Application

The Expanse is designed to cover the entire rear panel of a cabinet, flooding the interior with backlit illumination. Installation is seamless with a simple magnetic bracket system to hold the panel in place.





Expanse Pro - **CCT LED Illuminated Back Panel (2700K - 6000K)**

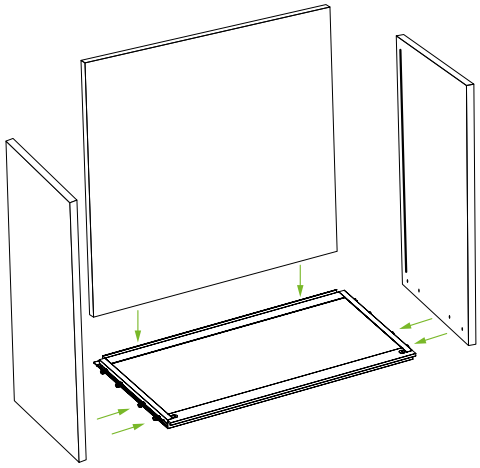
Verona

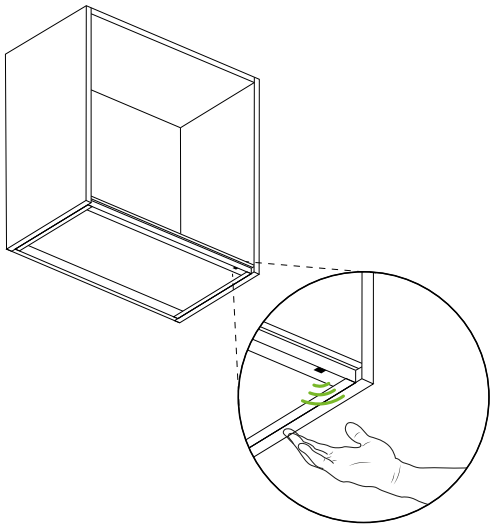
CCT LED Illuminated Base Panel

- A unique, integrated illuminated glass base panel with a superb light output that can transform a normal kitchen wall base unit into an illuminated base panel casting light both down to the worktops and up inside the wall unit
- The LEDs are encased between two glass panels which diffuse the light across the whole panel
- Correlated Colour Temperature (CCT) allows the perfect light temperature selection and transition from warm to cool white temperatures
- Controlled with a simple hand swipe to activate the integrated IR sensor

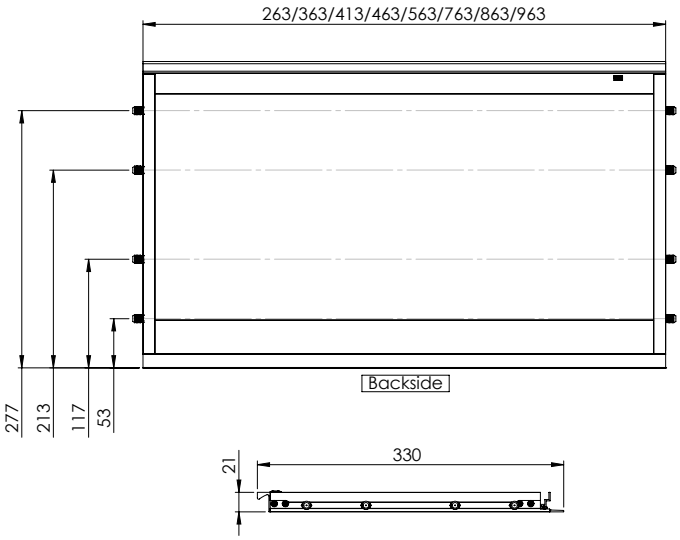
Application



The Verona is designed to flood light both over the work surface and up inside the cabinet, acting as the base panel for the cabinet structure.



Activate the lighting and adjust colour temperature with intuitive, hands-free control via the integrated infra-red sensor.



Verona - **CCT LED Illuminated Base Panel (2700K - 6000K)**

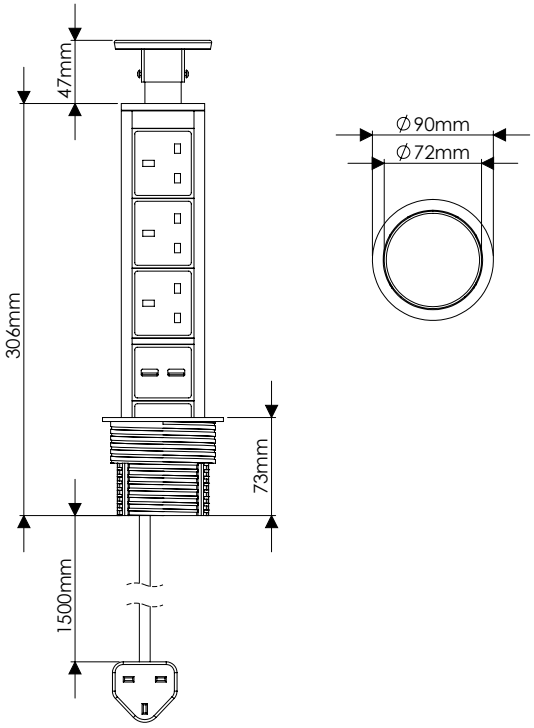
SensioPod M - **Motorised Socket with Bluetooth & Qi Charger**

CODE	COLOUR	CONNECTION	POWER SUPPLY
SE893920	Aluminium	13A plug	Sockets: 2 x power, 2 x USB ports & Bluetooth Speaker

Simple Installation

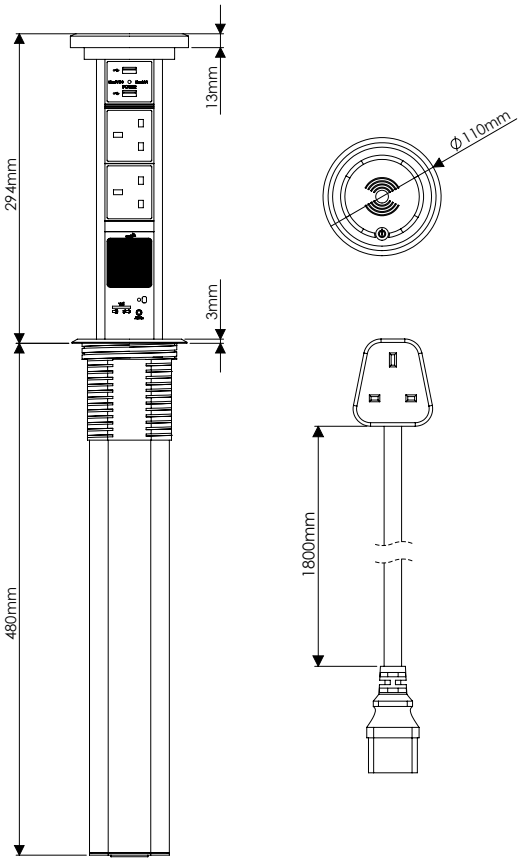
SensioPod E

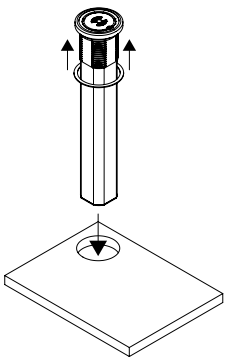
A simple mounting ring contains the spring mechanism to raise and close the pod. The unit hangs open when recessed beneath the surface.



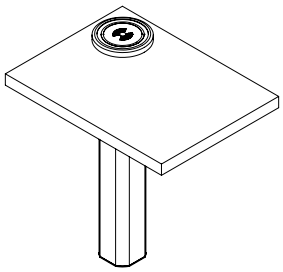
SensioPod M / M Bluetooth

A sleeve houses the motorised mechanism and descends beneath the work surface. Additional space should be considered as the lower part is taller.

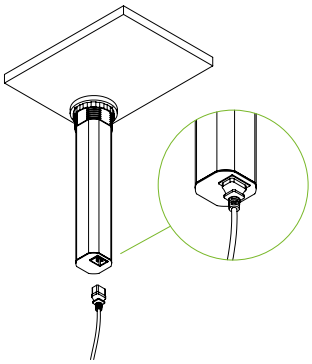




Create a hole - Route a hole in the work surface where the SensioPod will be installed.



Slot in the SensioPod - Recess the SensioPod into the hole so that the ring sits flush to the surface.



Connect the power - Connect the power lead under the unit and plug into the power.

LIGHTING POWER & CONTROL

- Multiple light type controls to enable light zoning
- Simple functionality via remotes, sensors or smart home devices
- Control the mood and functionality of the room with lights

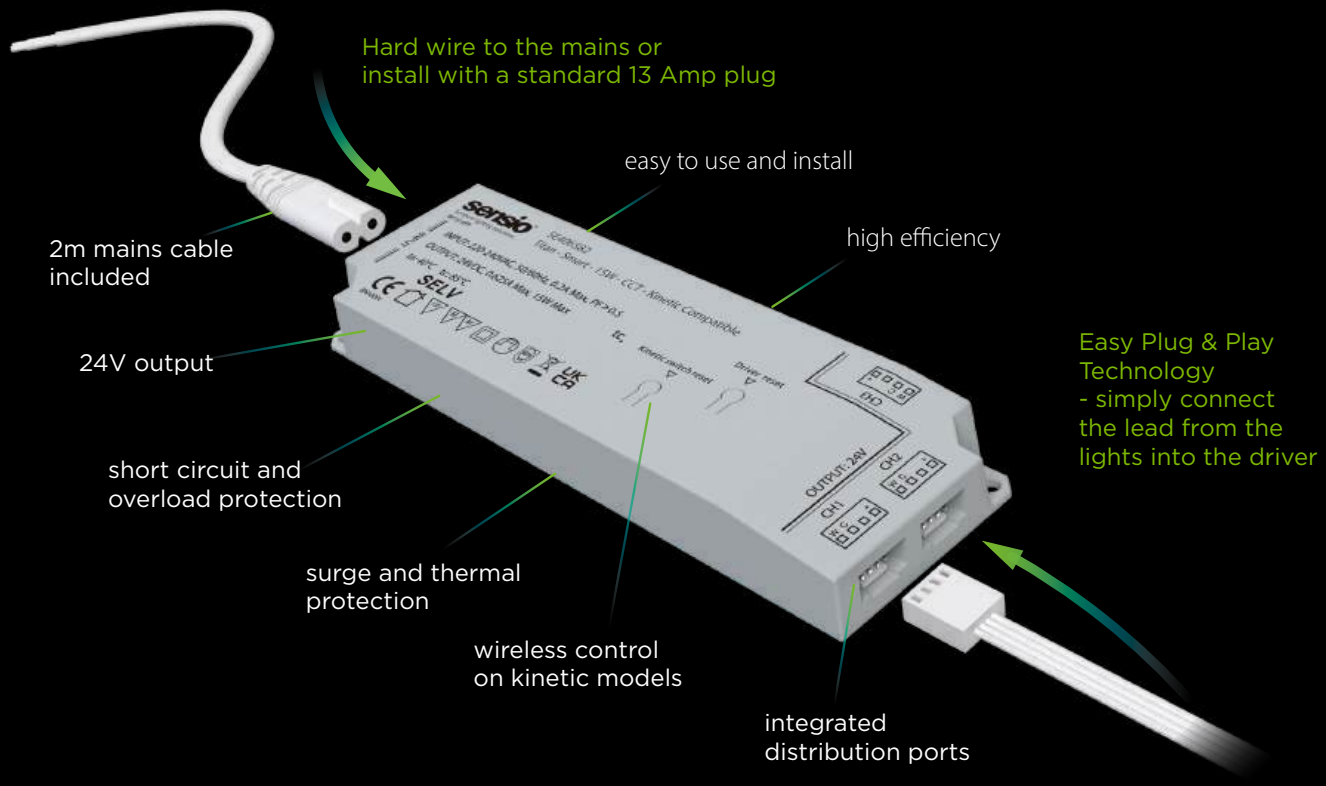
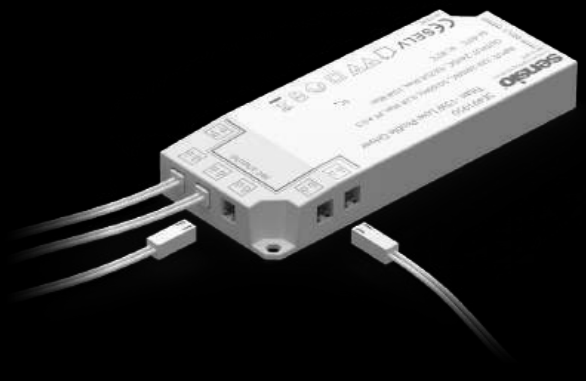
TITAN DRIVERS

Our Titan range of drivers are packed with features, offering an excellent choice based around how the lights will be controlled. All Titan drivers feature a slimline profile measuring just 16mm in depth making them a discreet solution that can be hidden away easily during installation. The drivers all feature integrated connector ports rather than a traditional distribution block, streamlining the design.



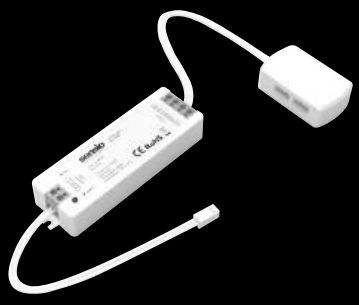
Multiple lighting lines

Simultaneously run multiple light lines. Just remember to total the wattage.



Advanced control options

Incorporate receivers and sensor extensions to increase the driver functionality.



Titan Dimmable

Driver

- Depth of 16mm
- Integrated 2-pin connector, distributor ports
- 2m mains cable included
- Short circuit & overload protection
- Surge and thermal protection
- Wide dimming range: 5% - 100%
- Wall dimmable
- Easy to use - Just plug and play
- Minimum 25% load

TIP

Consider the wattage. Dimmable drivers require a minimum 25% load to function efficiently.

- For 15W, connect a minimum 3.75W of lighting
- For 30W, connect a minimum 7.5W of lighting
- For 60W, connect a minimum 15W of lighting

Titan Dimmable - **Compatible with a wall dimming switch**

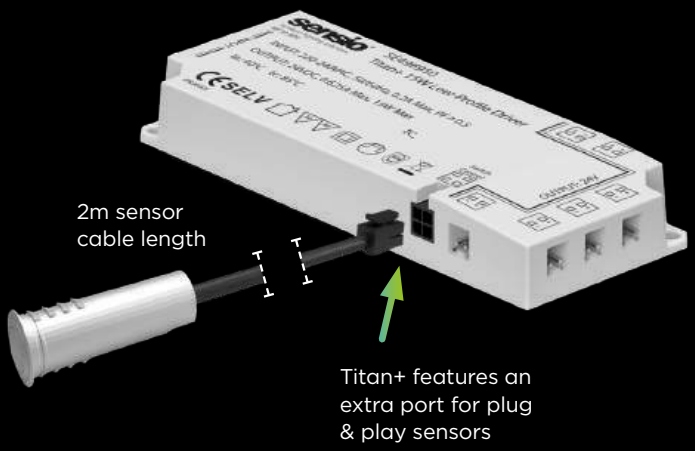
Titan+

Sensor Driver



- Slim 16mm depth
- Easy to use and install
- Available as 6W/15W/30W
- Integrated 2-pin connector, distribution ports
- Compatible lighting control accessories - PIR, IR, Switch & Door sensors. Simply plug in the chosen sensor to the designated port in the driver.
- Mains cable included
- Dimmable when paired with the Titan+ IR sensor

Titan+ - **Plug & play sensor drivers**

CODE	DRIVER	PORTS
SE150004A0	Titan+ 60W Driver	6
SE497950	Titan+ 30W Driver	6
SE496950	Titan+ 15W Driver	6
SE495950	Titan+ 6W Driver	4

The Titan+ is not suitable for direct use with a mains, wall dimming switch. All of our accessories control the current after the driver circuit.

Plug & Play Sensor Control

- Perfect for recessed or surface mounting (with the included bracket)
- Cut out diameter of 12mm
- 2m connection cable

Titan+ IR Sensor

- Allows activation of all lighting plugged into the Titan+ driver with the swipe of a hand
- Detection range of 0-5cm
- Adds dimmable functionality to Titan+ driver

Titan+ PIR Sensor

- Allows activation of all lighting plugged into the Titan+ driver by detecting motion
- Detection range of 0-3m
- Detection angle of 120°

Titan+ Push Switch

- Allows activation of all lighting plugged into the Titan+ driver with the push of a button
- Perfect for recessed mounting in to a worktop
- Features a robust clicker switch

Titan+ Door Sensor

- Allows activation of all lighting plugged into the Titan+ driver with the opening and closing of doors

Titan+ Sensor Adapter

- Turn any standard driver into a Titan+
- The Titan+ Sensor Adapter allows this sensor range to be used with any driver featuring 2-pin ports to control lights placed afterwards in the chain.

Port Expander

- Increase the capacity of the driver with an added 12 ports
- Always remember the total wattage of lights connected should not exceed that of the driver

New for 2025. We have introduced a 60W driver to our Titan+ range to create longer runs of flexible strip lighting or simplify installation, allowing many lights to be illuminated from one power source.

SE797991	Titan+ Double Door Sensor Adapter

TrioTone® Control

Simplifies Colour Selection

Connects a CCT light to a standard Titan+ driver

The TrioTone® controller allows you to select cool white (5000K), natural white (4000K) or warm white (3000K) with the touch of a button. The controller plugs directly into any standard LED driver, making any CCT product TrioTone® compatible. This enables the light source to be matched to any interior design style, as well as providing the flexibility to be changed in the future.

NEW

Titan+ Wireless

Sensor Range

Bluetooth®

Eliminate the hassle of wires and cables with the Titan + Wireless range. Available in 4 different sensor options, giving a choice of control and allowing bespoke product creation. As well as ease of use, the Titan+ Wireless range reduces energy consumption, as they don't require a constant power supply or connection.

- No messy wires to hide
- Perfect for surface mounting with the included bracket
- Available in 4 types - Touch, IR, Door and PIR sensor
- Compatible with the Titan+ Driver
- Easily pair up to 10 sensors to one receiver for wireless connection
- Detection range from sensor to receiver: up to 5m

Discreet control anywhere.

One switch - controls all driver channels

Quick connect - receiver plugs directly into the Titan+ port

Effortless - one touch pairing

Low profile - sensor and bracket design

Intuitive hand-gesture control without the need to route extra cables

Titan+ Wireless IR Sensor - Activate by swiping hand in front of sensor or dim the lights by holding hand in front of sensor

Titan+ Wireless PIR Sensor - Lighting will activate with movement from up to 2500mm

Titan+ Wireless Door Sensor - Activate lighting by opening the cabinet door. Works for both single and double doors.

Titan+ Wireless Touch Sensor - Tap sensor to turn lighting on/off. Tap and hold sensor for 5 seconds to dim lighting

Sensor & Receiver - **ready to plug & play**

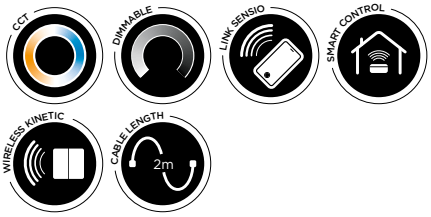
Titan Smart Kinetic

Wireless Switch & Voice Activated Driver



- Slim 16mm depth
- Easy to use and Install
- Integrated distribution ports
- Compatible with Amazon Alexa & Google Assistant for voice activated control over the lighting
- Combine with the Link Sensio Smart Phone App (available for both Android and iOS devices) to access a multitude of clever features such as dimming, colour changing and lighting schedules
- For wireless lighting control, pair with the Titan Kinetic Switch - the multi-functional buttons allow intuitive control over power, dimming and colour temperature and require no wiring or mains power
- Mains cable included
- Available for both single-colour and CCT lights

Titan - **Smart Kinetic Driver**

SE782990	2 Gang Kinetic Switch
SE783990	3 Gang Kinetic Switch
SE780990	Kinetic Reciever
SE90010	2500mm CCT Extension Lead
SE992990	CCT Port Expander - 4 Ports

Kinetic Switch Wireless Control

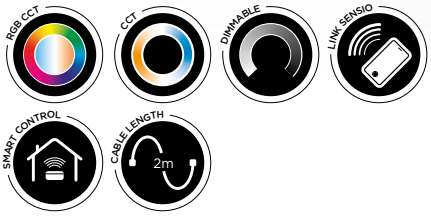
- Switch can be placed anywhere with no additional power or wiring required
- Simple, wall mount installation via screws or adhesive tape included
- Connects to the Titan Kinetic driver and 240V mains receiver at the press of a button
- One, two and three gang options available for additional control functions such as dimming, colour adjust and zoning

WiFi Smart Kinetic 240V Mains Receiver

- Allows control of any mains lighting with the wireless kinetic switch
- dimming with compatible lights such as the Sensio IP65 downlights
- WiFi function for control via the Link Sensio App and smart home devices
- 200 - 240V mains input
- Maximum load 100W

Titan Smart RGB CCT

Full Colour Control Smart Driver



- For use with the Sensio Flux RGB CCT and Polar RGB CCT Flexible LED strip lights
- Slim 16mm depth
- Easy to use and Install
- Integrated distribution ports
- Compatible with Amazon Alexa & Google Assistant for voice activated control over the lighting
- Combine with the Link Sensio Smart Phone App (available for both Android and iOS devices) to access a multitude of clever features such as dimming, colour changing and lighting schedules
- Mains cable included

Titan - **Smart RGBCCT Driver**

Link Sensio

Smart Phone App

The “Link Sensio” app is available to download for free on both iOS and Android smart devices. Use the app, in conjunction with a smart home device, to operate our Titan Smart Kinetic Driver.

Universal Remote Control

- The remote can control single colour lighting (dimming), CCT (tunable white) and RGB (colour changing) lights
- Offers a multitude of functions including the ability to set up channels and zone lighting
- Wall mounting bracket provided to keep the remote safe and secure when not in use
- Requires 2x AAA batteries (not included)

Use in conjunction with the appropriate receiver for the chosen lights.

Single colour Receiver

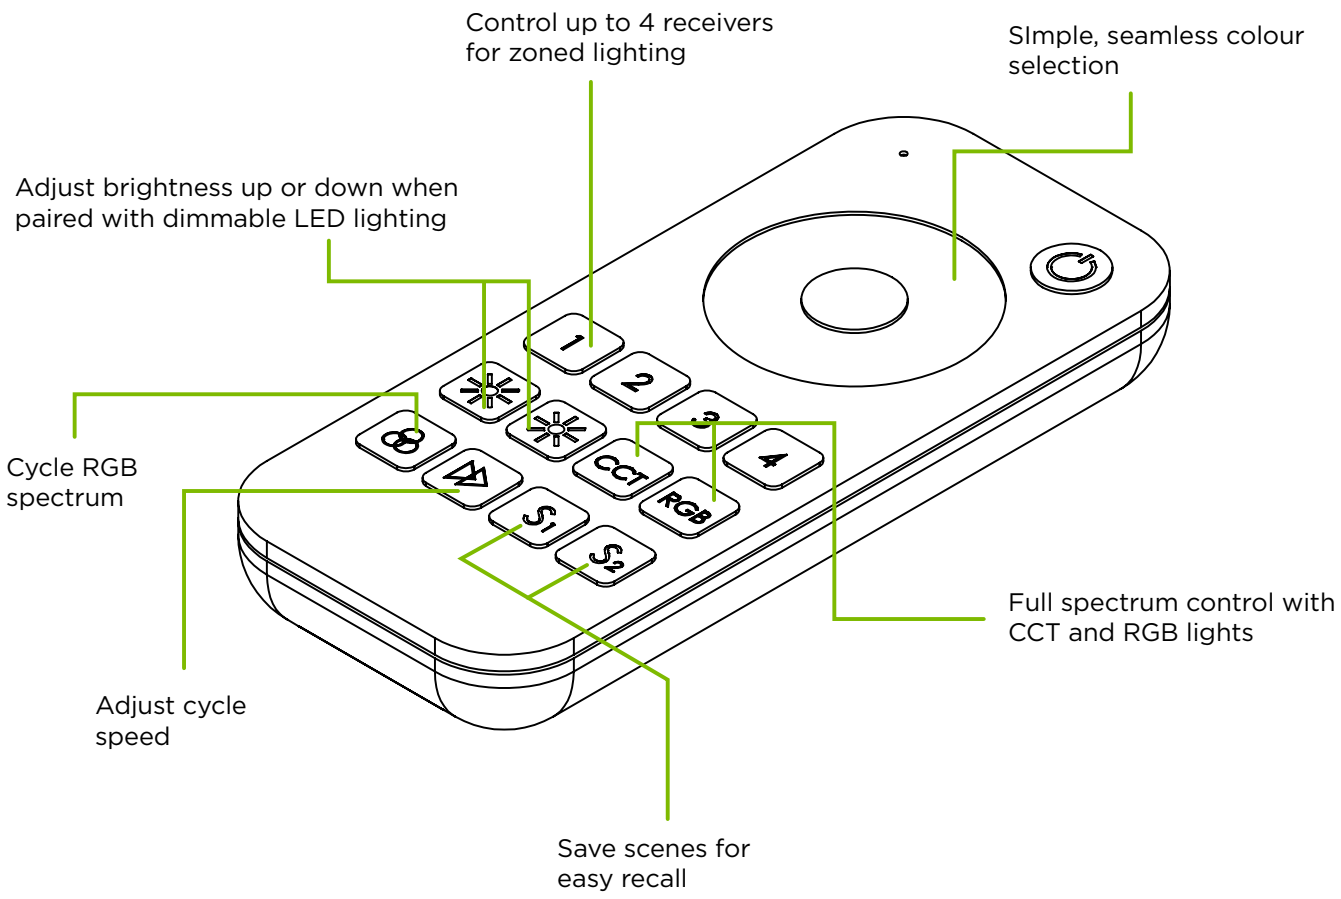
- Control single colour lighting products (e.g warm white colour temperature lights)
- The receiver has a memory function to recall settings
- Multiple receivers can be paired with the a single Universal Remote Control
- 30m range
- 96W at 12V and 192W at 24V

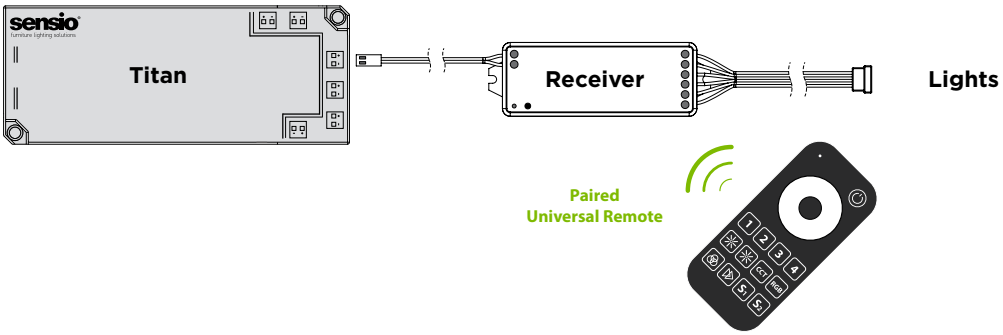
CCT Receiver

- Control CCT (Correlated Colour Temperature) lighting products
- The receiver has a memory function to recall settings
- Multiple receivers can be paired with a single Universal Remote Control
- 30m range
- 60W at 12V and 120W at 24V

RGB CCT Receiver

- Control RGB and CCT (Colour Changing Technology) lighting products
- The receiver has a memory function to recall settings
- Multiple receivers can be paired with a single Universal Remote Control
- 30m range
- 36W at 12V and 72W at 24V





Universal Remote Control & Receivers

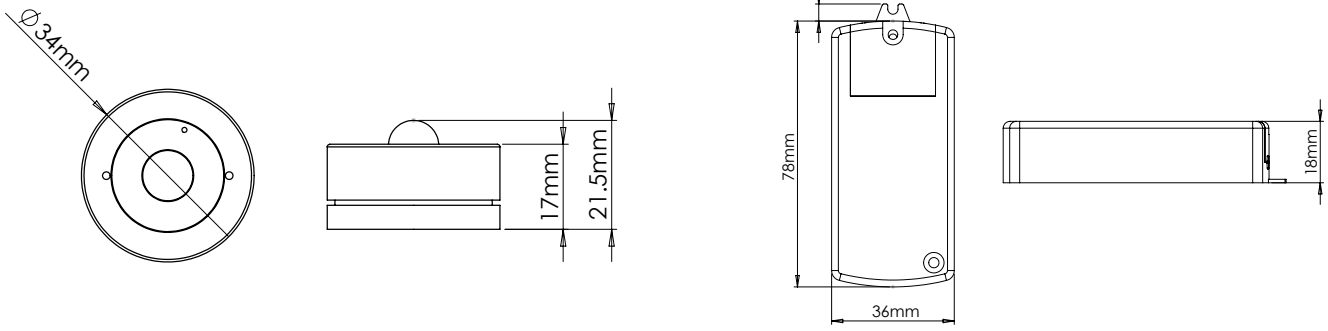
Wireless PIR

Motion Sensor Switch

- Activates lights on opening of a cupboard or entry of a room
- 1m-3m activation zone
- Automatically switches off the lights after 3 minutes if no movement detected
- Includes bracket for surface mounting of the sensor
- Available as a kit including the wireless receiver and sensor, in addition to single sensors which are sold separately
- One receiver can support up to 4 sensors to ensure there are no blind spots in detection



Wireless PIR - **Motion Sensor Switch**

CODE	DESCRIPTION	FINISH	MAX. WATTAGE	No. PORTS	QTY	DRIVER

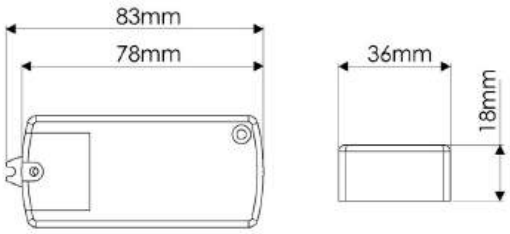
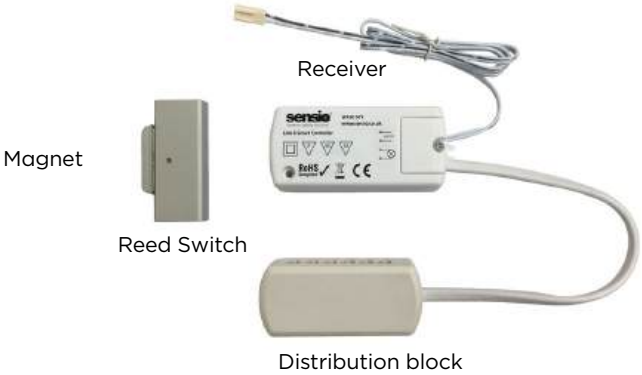
* 60W with 12V input or 120W with 24V input

Link-S

Receiver, Magnet & Reed Switch

- Control lighting wirelessly through the opening and closing of doors
- Magnet and Reed Switch suitable for mounting on any door and frame or surround
- Opening the door will send a signal to the receiver to trigger the lighting (as the magnet loses contact with the Reed Switch)
- Small size of components means that their appearance is discreet
- Control multiple lights within a kitchen or bedroom
- Range of >8m
- Battery life of >3 years
- One receiver can support up to five Magnets and Reed switches
- One Reed Switch and Magnet can support up to five receivers





Link-S - **Receiver, Magnet and Reed Switch**
